The five reports in ICP's
Congressional Series are:

The Impact of the Amendment of the Definition of "Developmentally Disabled" on the DD Program in FY '79 and FY '80	... No. 1
State Councils/Administrative Agencies Fill Gaps in the Service System - A Report	... No. 2
Protection and Advocacy in the United States - The First Three Years	... No. 3
Three Years of Grants of National Significance and Special Projects	... No. 4
University Affiliated Facilities, An Important Program for Developmental Disabilities	... No. 5

This report has been written and produced by the Institute for Comprehensive Planning. The report is produced in partial fulfillment of a contract between the Accreditation Council for Services for Mentally Retarded and Other Developmentally Disabled Persons (AC/MRDD) and the Institute for Comprehensive Planning (ICP). The contract is the result of a supplement to Department of Health and Human Services Grant Number 54-P-71506/01. The contents of the report, including conclusions, opinions and statements, contained in this report are solely the work of the author and in no way reflect the official position of the officials of the Administration on Developmental Disabilities, Department of Health and Human Services, or the Federal Government.

PREFACE

Grants of National Significance and Special Projects aided the Developmental Disabilities Program to stay on the cutting edge in developing new services and combinations of services for individuals who are developmentally disabled. In the years of adequate funding of Section 145 projects, such as FY '78, Grants of National Significance and Special Projects brought together the vast resources of the University Affiliated Facilities, the creativity of private organizations, and the vast experience of State Agencies in designing and developing new and varied service models for individuals who are developmentally disabled. This same funding source also provided the resources necessary for technical assistance to deliver these new service models to the Developmental Disabilities Program at the State and local level.

In FY '80 and FY '81, the Grants of National Significance and Special Projects have been grossly underfunded and the cutting edge has been left dull so that innovation and adaption of service modalities for our most severely handicapped population are not being done.

In prior years, the Developmental Disabilities Program was able to lead the way and blaze the trail from institution to community through new and different approaches in deinstitutionalization, normalization and mainstreaming. The trails are now again becoming overgrown and the trees which were blazed in the past have grown new bark. However, there are many more individuals who are developmentally disabled who still need society's help to overcome the real and self-conceived barriers which prohibit them from taking their place to the maximum extent possible in a free, dynamic and ever changing society.

This report on Projects of National Significance is written for two purposes. The first purpose is to serve as a plea to the policy makers that Grants of National Significance **should not** be an **historical** event but should remain and again become an adequately funded, vital component of the Developmental Disabilities Program. Without adequate funds, services and combinations of services stagnate and we provide what we always have provided even though needs change as society changes and even though we gain new technologies which could remove or relieve the developmental delay suffered by our population.

The second purpose of this report is to provide for the first time a national directory of those organizations and agencies which have conducted programs in the four priority areas of services listed in PL 95-602 and in related service areas. The last two sections of this report contain a listing by State of organizations and agencies which have conducted

programs and projects in the various service areas. Not only the programs funded by Grants of National Significance and Special Projects are herein contained, but also the projects funded by Part C monies at the State and local level are contained in this report.

In fiscally hard times, it is necessary that we share as much knowledge as possible in order to provide the best services and programs for our people for the least amount of cost. It makes economical and program sense to look at what has been done before starting a new program or expanding an existing program. Therefore, I have tried to provide a list of possible resources for those who wish to look at program models of existing and/or previously operated programs.

Any time one ventures into a national directory, it is going to be incomplete. I have probably missed more than I have included; for these omissions I apologize. However, no matter how primitive the listing, I am impressed with the variety of agencies and organizations which provide the many services for our very dear and most severely handicapped citizens. I hope that this report and the listing is helpful as we share experiences, and that it helps to improve and expand services to individuals who are developmentally disabled in the United States.

INTRODUCTION

Grants of National Significance and Special Projects have been part of the Developmental Disabilities Program since its inception. Grants of National Significance and Special Projects are funded under Part D of PL 95-602, Title V. Part D, entitled Special Project Grants, contains the following:

(a) The Secretary may make project grants to public or nonprofit private entities for--

(1) demonstration (and research and evaluation in connection therewith) for establishing programs which hold promise of expanding or otherwise improving services (particularly priority services) to persons with developmental disabilities (especially those who are disadvantaged or multihandicapped); and

(2) demonstration (and research, training, and evaluation in connection therewith) for establishing programs which hold promise of expanding or otherwise improving protection and advocacy services related to the State protection and advocacy system (described in Section 113).

(b) Grants provided under subsection (a) shall include grants for--

(1) public awareness and public education programs to assist in the elimination of social, attitudinal, and environmental barriers confronted by persons with developmental disabilities;

(2) coordinating and using all available community resources in meeting the needs of persons with developmental disabilities (especially those from disadvantaged backgrounds);

(3) demonstration of the provisions of services to persons with developmental disabilities who are also disadvantaged because of their economic status;

(4) technical assistance relating to services and facilities for persons with developmental disabilities, including assistance in State and local planning or administration respecting such services and facilities;

(5) training of specialized personnel needed for the provision of services for persons with developmental disabilities or for research directly related to such training;

(6) developing or demonstrating new or improved techniques for the provision of services to persons with developmental disabilities (including model integrated service projects);

(7) gathering and disseminating information relating to developmental disabilities;

(8) improving the quality of services provided in and the administration of programs for such persons; and

(9) developing or demonstrating innovative methods to attract and retain professionals to serve in rural areas in the habilitation of persons with developmental disabilities.

PL 95-602, Title V, Sec.145

For each of the three fiscal years covered by this report, FY '78 through FY '80, the Bureau of Developmental Disabilities printed an announcement of intention to make grants in certain priority areas which were consistent with the eleven areas of activities designated in Parts a and b of Section 145.

The introduction to the announcement appeared in the Federal Register on Monday, August 18, 1980. This announcement was for the Special Project Grant Program - Projects of National Significance in Developmental Disabilities.

OFFICE OF HUMAN DEVELOPMENT SERVICES

[Program Announcement No. 13631.801]

Special Project Grant Program - Projects of National Significance In Developmental Disabilities

AGENCY: Office of Human Development Services, DHHS

SUBJECT: Announcement of availability of grant funds for the special project Grant Program - Projects of National Significance In Developmental Disabilities

SUMMARY: The Administration on Developmental Disabilities (ADD) announces that applications will be accepted for grants under the Special Project Grant Program - Projects of National Significance authorized by Title I, Section 145 of the Developmentally Disabled Assistance and Bill of Rights Act, Pub.L.95-602, [42 U.S.C. 6001]. Regulations applicable to this program include the Administration on Developmental Disabilities general regulations, 45 CFR Part 1385, and the regulations governing Discretionary Grant Programs [45 CFR Part 1387].

DATE: Closing date for receipt of applications is September 5, 1980.

Scope of this Announcement

This program announcement covers only projects of national significance authorized under the Special Project Grants Program of the Developmentally Disabled Assistance and Bill of Rights Act, Pub.L.95-602, and encompasses only those projects that relate to the Developmental Disabilities Protection and Advocacy Systems.

Program Purpose

The Special Projects Grant Program, as authorized in Section 145(a) of Pub.L.95-602, enables the Administration on Developmental Disabilities to award grants for a variety of purposes, among which are:

1. To demonstrate how to establish programs which will expand or improve services to developmentally disabled persons
2. To increase public awareness and public education programs
3. To demonstrate services for economically disadvantaged developmentally disabled persons
4. To gather and disseminate information.

For the purposes of this program announcement, these projects must:

- (1) Be designed to have a direct impact on Developmental Disabilities State Protection and Advocacy systems throughout the country; and
- (2) Involve activities to be conducted in a number of sites in various parts of the country as part of a unified program.

Program Goal and Objective

All States and Territories participating in the Basic State Formula Grant Program have systems designed to protect and advocate for the rights of persons with developmental disabilities. Staff of Protection and Advocacy Systems must deal with a wide variety of programs and issues, including legal matters on behalf of the developmentally disabled persons whom they serve. Many of the systems need information in the most expeditious manner possible on relevant laws, court decisions, as well as guidance on legal matters in order to protect their clients' rights to services.

The purpose of these projects is to provide back-up specialized knowledge, legal expertise, and support to State Protection and Advocacy Systems that will enhance and strengthen their capabilities to engage in outreach to minority, institutionalized, geographically isolated and other hard-to-reach persons with developmental disabilities. Specifically, the objectives for these projects are:

1. To provide State Protection and Advocacy Systems with the necessary legal and technical information that will assist them in assuring the rights of institutionalized, minority and other under-served and under-involved persons with developmental disabilities; and
2. To provide technical information to State Protection and Advocacy systems to enable them to overcome obstacles to reaching underserved, traditionally separated, and isolated persons with developmental disabilities.

eligible Applicants

Applications may be made by public or private non-profit organizations experienced in the provision of legal services and which have particular expertise in areas relevant to the rights of developmentally disabled persons. Applicants must have legal and technical expertise specifically related to the civil rights of institutionalized developmentally disabled persons as well as the rights of developmentally disabled members of racial and ethnic minority groups affirmed in Title VI of the Civil Rights Act.

Grants of National Significance and Special Projects are especially important to the Developmental Disabilities Program in that they supply the models and open up new areas of service which remain unexplored and undeveloped. Especially did Grants of National Significance and Special Projects have a significant impact on the service delivery system in the mid-70's when deinstitutionalization, normalization, and mainstreaming came into the vocabulary. It was through Grants of National Significance and Special Projects that models of services, especially support services located in the community, were conceived and tested. Many of these model programs were then adapted to local situations and funded through Part C monies and offered by University Affiliated Facilities on a regular basis.

It is important that a developmental program such as Developmental Disabilities have a well funded component such as Grants of National Significance and Special Projects. The individuals who are developmentally disabled are in need of

"a combination and sequence of special, interdisciplinary, or generic care, treatment, or other services which are of lifelong or extended duration and are individually planned and coordinated." Without a well funded Special Projects program, new and innovative services and combinations of services are impossible.

The rapid growth of community support systems for deinstitutionalization can partially be traced to model programs and program combinations developed through funding from Grants of National Significance and Special Projects. Especially is this true of models requiring interdisciplinary treatment systems where University Affiliated Facilities and communities jointly sponsor the development of multiple programs for individuals who are developmentally disabled.

The Grants of National Significance fell on hard times in FY '79 and FY '80, having funds cut 76% to just over \$4.7 million in the later year. In FY '78, funding was over \$19.5 million for Section 145 projects which initiated the pioneering efforts in programming for individuals who are developmentally disabled.

The cycle of program development for new service modalities often started with ideas funded through Grants of National Significance and Special Projects, observed by universities and organizations which provided technical assistance to the Developmental Disabilities Program, and supported with Part C monies and State and local funds. The cycle could take three to five years to effect changes or new programs could be implemented within a year after the initial funding of an original Grant of National Significance or Special Project.

The dental program for individuals who are developmentally disabled is one example of State and local communities implementing the program immediately after the first year of funding of a Grant of National Significance. Other examples can be found in a multitude of recreation programs which were originally funded as Special Projects and continued with State and local funds.

Grants of National Significance are grants provided to programs which have promise of national or multi-regional effect on the Developmental Disabilities Program and/or its intended target population. Special Projects are projects of significance at the regional and/or multi-state level. The Grants of National Significance are generally awarded at the national level by the Administration on Developmental Disabilities and its predecessor agencies. Special Projects are generally awarded at the regional level. However, because of the severe restriction in Section 145 funds in FY '81, no new Special Projects were awarded in that fiscal year. Only four new Grants of National Significance were awarded in FY '81.

The contents of this report describe the funding of the Grants of National Significance and Special Projects, the organizations and agencies which conducted the programs, and the type of programs and projects supported.

The last two sections of this report are most exciting in that these sections contain a listing of the organizations and agencies which have not only conducted Projects and Programs of National significance and Special Projects, but also organizations and agencies which have conducted projects and programs funded with Part C monies. One section contains a listing of organizations and agencies which have conducted programs and projects in the four priority areas of service listed in PL 95-602. These four priority areas of service are Alternative Community Living Arrangements, Case Management, Child Development, and Nonvocational Social Development. The other section contains a listing of organizations and agencies which have conducted programs and projects in related service areas, such as Vocational Training and Advocacy.

APPROPRIATIONS AND DISTRIBUTION OF RESOURCES

The Special Projects component of the Developmental Disabilities Program has almost ceased to exist because of the drastic cutback in appropriations. The cutback of appropriations in the area of Special Projects was unfortunate both in magnitude and timing. The severe cutback of appropriations in FY '80 limited the amount of assistance at the national and regional levels which could be provided to the DD community in the implementation of the definition of PL 95-602 and the understanding of the four priority service areas. The lack of appropriation also limited the amount of assistance which could be provided in the development of the comprehensive evaluation plan in accordance with Section 110 of PL 95-602. Without the Special Projects, the DD Program has not the flexibility and resources to provide the technical assistance, model programming, and regional and national demonstration necessary at a time of massive program change. Therefore, the de-appropriation of Special Projects in light of program needs.

The reduction of funds provided for the Special Projects is illustrated by the appropriations provided for Special Projects for FY '78, FY '79, and FY '80. Table 1 shows the amount of appropriation provided for Special Projects in each of the three fiscal years.

TABLE 1. AMOUNT OF APPROPRIATION AND PERCENT OF CHANGE FROM FY '78 FOR SPECIAL PROJECTS FOR FY '78, FY '79, AND FY '80

Category of Special Projects	Appropriation for FY '78	Percent	Appropriation for FY '79	Percent of Change	Appropriation for FY '80	Percent of Change
Project Grants	\$13,801,000	100	\$ 3,001,000	- 78	\$1,977,000	- 86
Projects of Nat'l Sig.	4,695,000	100	9,187,000	+ 95	2,399,000	- 49
Special Studies	500,000	100	0	-100	0	-100
Program Evaluations	571,000	100	385,000	- 33	380,000	- 33
Total	\$19,567,000	100	\$12,573,000	- 35	\$4,756,000	- 76

It is apparent from appropriation levels over the three year period that all phases of Special Projects have been virtually eliminated from the Developmental Disabilities Program. There was an overall reduction of 35% in FY '79 and an overall reduction from FY '78 of 76% in FY '80. The level of funding was reduced from \$19.5 million in FY '78 to \$4.7 million in FY '80.

The various categories of Special Projects were almost equally reduced over the three year period with the exception of the Projects of National Significance in FY '79.

Project grants were usually distributed and supervised at the regional level. The administrative structure of Developmental Disabilities provides for ten Regional Directors of Developmental Disabilities. A Regional Director is placed in each of the ten Health and Human Services regions.

The Central Office of the Administration on Developmental Disabilities and its forerunner would have published in the Federal Register the announcement and Request for Proposal for Special Project grants. The Regional Directors would receive the proposals, supervise the peer review process, and have the regional grants personnel award the grant. The Regional Director of Developmental Disabilities would then supervise the implementation and operation of the project to its conclusion.

As is evident from the information presented in Table 1, the amount of funds appropriated for project grants was reduced 78% in FY '79 from the FY '78 level, and reduced 86% in FY '80 from its FY '78 level. As any program specialist can verify, this magnitude of reduction over a twenty-four month period eliminates the program resources and research capabilities.

Projects of National Significance were projects which attempted to provide model programs having universal application and provide technical assistance from a national perspective. The Projects of National Significance were successful in performing this mandate.

Projects of National Significance funded the design and implementation of the comprehensive planning system used by all of the DD State Planning Councils and Administrative Agencies. Without this uniform process of planning, coordinated program data from each of the States and Territories would have been unattainable.

Also, the telecommunications system in place throughout the University Affiliated Facilities was the result of a Project of National Significance. Coordinated UAF data would have been unattainable without the Projects of National Significance.

Appropriations for Projects of National Significance were increased 95% in FY '79 from the FY '78 level. However, as is demonstrated later in this report, much of these funds had to be

used for second and third year commitments made under FY '78 project grants which had potential of being national demonstration projects. The FY '80 level of Projects of National Significance was reduced 49% from its FY '78 level.

There was only one special study during the three year period covered by this report. The special study was the definition study. The result of this study was to change the definition of developmental disabilities from the one in PL 94-103 to the current definition contained in PL 95-602. (See ICP's Congressional Series Report No. 1 for a description of the impact of this change of definition on the DD Program.)

Program evaluation received much attention in FY '80 with the requirement to implement Section 110 of PL 95-602, Part V. However, funding for program evaluation has been cut 33%, both in FY '79 and FY '80 from the FY '78 **level**.

Special Projects, when adequately funded in FY '78, relied on a variety of resources to provide the demonstration, advocacy, technical assistance, and applied research mandated in Section 145 of PL 95-602. The following accounting of projects and resources used for Special Projects in FY '78, FY '79, and FY '80 demonstrates conscious stewardship on the part of the Administration on Developmental Disabilities and its forerunner to make the Special Projects work for the benefit of the individuals with developmental disabilities by efficiently and effectively developing model and demonstration programs, strengthening the State Planning Councils and Administrative Agencies, and researching problematic areas in an effort to find solutions.

The Special Project monies were distributed throughout the developmental disabilities system through national and regional grants. Table 2 shows the distribution of the Special Project monies according to regions and national offices. The Projects of National Significance have been included on this table due to utilization of some of these funds in FY '79 for Special Projects.

The information presented on Table 2 shows just over 70% of the Special Projects monies were used for Special Projects at the regional level and almost 30% of the monies were used for Projects of National Significance in FY '78. There was a total of \$13.8 million expended for Special Projects at the regional level in FY '78 and just over \$5.8 million expended on Projects of National Significance.

In FY '79, almost 58% of the Special Project monies were expended for Projects of National Significance. The 58% does not include almost 18% of the monies of Projects of National Significance used for Special Projects at the regional level. A total of 42% of the Special Projects monies were used for Special Projects at the regional level. A total of \$7.2 million was expended for Projects of National Significance in FY '79. A total of almost

**TABLE 2. DISTRIBUTION OF SPECIAL PROJECT MONIES FOR FY '78, FY '79, AND FY '80
BY REGIONS AND NATIONAL OFFICE**

Administration area	FY '78		FY '79		FY '80	
	Amount	%	Amount	%	Amount	%
Central Office ¹	\$5,766,000	29.5	\$7,279,792 ²	57.9	\$2,779,000	58.4
Region I	535,732	2.7	382,121	3.0	211,761	4.5
Region II	1,730,838	8.8	781,869	6.2	189,595	4.0
Region III	1,708,927	8.7	876,322	7.0	212,687	4.5

Region V	2,555,355	13.1	818,497	6.5	180,000	3.8
Region VI	1,653,386	8.4	395,863	3.2	185,049	3.9
Region VII	1,123,891	5.7	286,396	2.3	195,000	4.1
Region VIII	481,864	2.5	289,133	2.3	164,393	3.5
Region IX	915,211	4.8	431,523	3.4	213,984	4.5
Region X	1,300,117	6.6	309,106	2.5	204,197	4.2
Total Region	\$13,801,000	70.5	\$5,293,208 ³	42.1	\$1,977,000	41.6
Total Special Projects	\$19,567,000	100	\$12,573,000	100	\$4,756,000	100

¹ Totals include amounts funded for special studies and evaluation efforts.

² Does not include the \$2,292,208 which was used for Special Projects.

³ Includes \$2,292,208 of Projects of National Significance money used for continuation of Special Projects.

\$5.3 million was expended for Special Projects at the regional level in FY '79.

In FY '80, the distribution of Special Project funds almost paralleled that of FY '79. Fifty-eight percent of the Special Project funds were expended for Projects of National Significance. Almost 42% of the Special Project funds were expended for Special Projects at the regional level. There was a total of just over \$2.7 million expended for Projects of National Significance in FY '80. There was a total of just over \$1.9 million expended for Special Projects during the same year.

PROJECTS FUNDED

The legislative mandate for Special Projects contained in Section 145 of PL 95-602 requires attention be paid to specific areas and activities of the Developmental Disabilities Program. The specific areas identified in Part A of Section 145 are the priority service areas and advocacy services. There are four priority service areas identified in PL 95-602 which are to be emphasized by the DD Program. These four priority areas are:

1. Case Management Services
2. Child Development Services
3. Alternative Community Living Arrangements
4. Nonvocational Social Development Services

There are several areas and activities identified in Part B of Section 145 for which attention is to be paid through the funding of Special Projects. The areas and activities so identified are:

Public Awareness
Coordination of Services
Demonstration Projects
Technical Assistance
Training
Model Programs
Information Dissemination
Improving Quality of Services
Projects for Special Groups

In order to document the areas in which projects were funded for Projects of National Significance and Special Projects, all projects for FY '78, FY '79, and FY '80 have been grouped under topical headings which closely parallel those identified in Section 145 of PL 95-602. The topical headings which are used for this part of the report are as follows:

1. Child Development
2. Case Management
3. Alternative Living Arrangements
4. Nonvocational Social Development
5. Technical Assistance
6. Training
7. Employment/Vocational Development
8. Advocacy
9. Programs for Special Groups
10. Standards/Needs Assessment
11. Public Awareness
12. Council Activity

Table 3 shows the number of projects, percent of resources, and the amount of money expended for Projects of National Significance in each of the three fiscal years.

There were a total of 69 individual Projects of National Significance funded during the three fiscal years. The projects on Table 3 have been recorded as one year projects, separate for each fiscal year, although many of the projects are funded for two or three years. However, for the purposes of comparing expenditures between fiscal years it is assumed that each project is a one year project.

In FY '78, 20% of the Projects of National Significance monies were for technical assistance. Almost 17% was expended for alternative living arrangements and 15% for advocacy. Nearly 14% was expended for nonvocational social development. Programs for special groups accounted for just under 12% of expenditures. Just under 8% was expended for training. Child development, standards/needs assessment, and public awareness each received 5% of the funding in FY '78.

TABLE 3. AMOUNT AND PERCENT OF RESOURCES AND NUMBER OF PROJECTS OF NATIONAL SIGNIFICANCE BY TOPICAL HEADINGS FOR FY '78, FY '79, AND FY '80

Advocacy	6	851,055	14.8	5	1,062,924	14.6	7	768,720	27.7
Pro.for Special Groups	7	680,323	11.8	3	526,702	7.2	2	320,000	11.5
Standards/Needs Asses.	2	273,935	4.8	1	275,110	3.8	1	296,075	10.6
Public Awareness	3	307,870	5.2	2	82,106	1.1	0	0	0
Council Activities	0	0	0	1	1,499,825	20.5	0	0	0
Total	40	\$5,766,000	100	34	\$7,279,792	100	24	\$2,779,000	100

Just over 50% of the expenditures for Projects of National Significance in FY '78 went to the four priority areas and advocacy or the activities identified in Part a of Section 145 of PL 95-602.

In FY '79, Council activities received 20.5% of the funds from Projects of National Significance. This was the funding of the UAF telecommunications project already referred to in this report.

Almost 15% of the project funds was used for advocacy and 15% was used for projects in alternative living arrangements. Just over 10% of the funds was used for technical assistance and just over 10% was used for training. There was an equal amount used for child development and for case management. Just over 7% was used to fund projects for programs for special groups. Nearly 4% was used for the developing of standards. Public awareness received 1% of the funds in FY '79.

In FY '79, 46% of the National Significance monies was expended in the four priority areas of service and advocacy. These are the activities identified in Part a of Section 145 of PL 95-602.

In FY '80, almost 28% of the Projects of National Significance monies was spent for advocacy. Nearly 20% of the money was expended for technical assistance. Over 13% of the money was expended for training, and almost 12% was expended for projects for special groups. Over 10% of the monies was expended to develop standards for the services provided for individuals who are developmentally disabled. Nearly 10% was expended for projects in alternative living arrangements. Just over 3% of the funds was used for two projects in child development and just over 3% was used for one project in nonvocational social development in FY '80.

In FY '80, nearly 45% of the Projects of National Significance monies was expended for projects in the four priority areas and advocacy. These are the activities which are listed in Part a of Section 145 of PL 95-602.

Figure 1 shows the percent of Projects of National Significance by topical headings for the three fiscal years of '78, '79, and '80. There was a total of \$15.8 million expended for Projects of National Significance during the three years.

Seventeen percent of the National Significance project funds was used to develop and aid the advocacy program for the Developmental Disabilities Program during the three fiscal years of '78, '79, and '80.

The next largest category of projects was technical assistance, for which 15.7% of the resources was used. These projects were used to aid DD Councils/Administrative Agencies to implement the DD Program and aid in the development of staff and service providers.

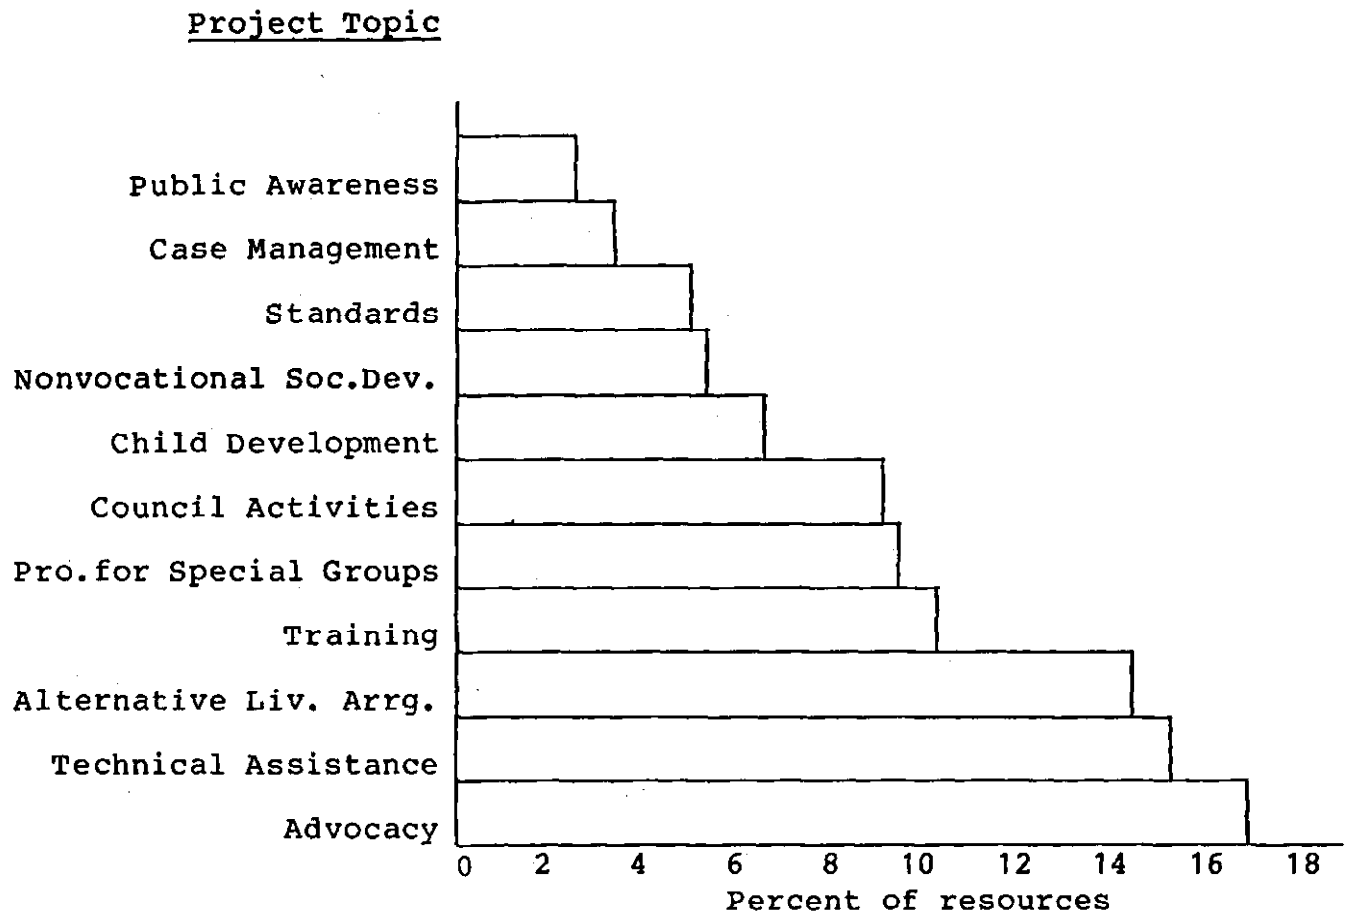

Figure 1. Percent of Resources Used for Projects of National Significance by Project Topic for the Three Fiscal Years '78, '79, and '80

Nearly 15% of the resources was used for projects in alternative living arrangements. Several of the projects funded under this topic were in deinstitutionalization, which was the emphasis of the DD Program in FY '78.

Ten percent of the resources was used to fund training projects. The development of Council staff, Council membership, interdisciplinary training and specialized personnel were included in training projects funded during the three years.

There was 9.6% of the resources used for programs for special groups. These projects included projects for the aged, programs for delivery of services in rural areas and projects for minority groups.

There was 9.5% of the resources used to develop the telecommunications system for the University Affiliated Facilities.

Just over 6% of the Projects of National Significance monies was used for projects in child development. Projects in this area included prevention, genetics, preschool, and demonstration projects in early intervention.

Nearly 6% of the monies was used for projects under non-vocational social development, including coordination of services, dental programs, and social adjustment programs.

The Administration on Developmental Disabilities has expended just over 5% of its resources to develop and implement national standards for service providers who provide institutional care and alternative community living arrangements. As a result of this expenditure, national standards for services provided to individuals who are developmentally disabled exist.

Almost 4% of the resources was expended for projects in case management. Public awareness projects accounted for 2.5% of the expenditures during the three year period.

There was nearly equal distribution of expenditures between those activities identified in Part a of Section 145 of PL 95-602 and those activities identified in Part b of the same section. There was a total of 47.4%, or \$7,492,917 expended for projects in the four priority areas and advocacy during the three year period. There was a total of 52.6%, or \$8,331,875 expended for projects under headings identified in Part b during the three year period from October 1, 1977 through September 30, 1980.

Table 4 shows the number of projects, percent of resources, and the amount of money expended for Special Projects in each of three fiscal years. The Special Projects were funded by regional offices of the Developmental Disabilities Administration, as previously explained.

There were 210 individual Special Projects funded in Fiscal Years '78, '79, and '80. The projects in Table 4 have been recorded as one year projects, separate for each fiscal year, although many of the projects are funded for two or three years. Many of the projects identified in FY '78 are continuation years of projects originally funded in FY '76 and FY '77. However, for the purposes of comparing expenditures between fiscal years, it is assumed that each project is a one year project.

In FY '78 there was \$13.8 million expended for Special Projects. Over 18% of this amount was expended for employment and vocational development projects. There were 40 such projects funded in that year. FY '78 projects were funded under PL 94-103 and not subject to the four priority areas as in FY '79 and FY '80 under PL 95-602.

TABLE 4. AMOUNT AND PERCENT OF RESOURCES AND NUMBER OF SPECIAL PROJECTS BY TOPICAL HEADINGS FOR FY '78, FY '79, AND FY '80

Project Topic	Fiscal '78			Fiscal '79			Fiscal '80		
	No.of Proj.	Amount	%	No.of Proj.	Amount	%	No.of Proj.	Amount	%
Child Development	5	\$ 212,979	1.6	0	\$ 0	0	0	\$ 0	0
Case Management	5	350,720	2.6	4	250,779	4.7	3	160,775	8.1
Alternative Liv. Arrg.	17	1,676,339	12.2	2	151,857	2.9	1	35,000	1.8
Nonvoc. Social Devel.	41	2,514,665	18.3	23	1,433,213	27.1	10	440,930	22.3
Technical Assistance	26	2,476,032	17.9	14	1,422,064	26.9	8	576,936	29.2
Training	23	1,481,473	10.7	8	560,688	10.6	4	158,859	8.0
Employment/Voc. Devel.	40	2,545,567	18.4	1	70,681	1.3	0	0	0
Advocacy	11	869,196	6.3	7	509,148	9.6	3	277,850	14.1
Pro.for Special Groups	10	652,567	4.7	8	582,679	11.0	6	245,288	12.4
Standards/Needs Asses.	3	310,088	2.2	0	0	0	0	0	0
Public Awareness	9	541,090	3.9	5	312,099	5.9	2	81,362	4.1
Council Activities	3	170,284	1.2	0	0	0	0	0	0
Total	193	\$13,801,000	100	72	\$5,293,208	100	37	\$1,977,000	100

There was over 18% of the Special Project monies expended for nonvocational social development projects. These projects involved dental services, offenders programs, recreation, and coordination of services within the community.

Just under 18% of the Special Projects monies was spent for regional technical assistance projects in FY '78. Over 10% of the Special Projects money was devoted to training projects at the regional, state and local levels. Over 12% of the funds was used for alternative living arrangement projects in FY '78.

Six percent of the monies was used for advocacy projects in the regions. The rest of the funds were used to fund projects in child development, case management, programs for special groups, needs assessment, and public awareness in FY '78.

There was \$5,293,208 expended for 72 Special Projects in FY '79. There is a change in emphasis from projects funded in FY '79 when compared to those funded in FY '78. Changes occurred in Special Projects funded in FY '79 because of the passage of PL 95-602. The four priority areas of service are included in the law and advocacy was in its second year of implementation.

Over 27% of the Special Project monies was expended in non-vocational social development projects. Also, 27% of the funds was expended for technical assistance projects which aided Councils in implementing the new legislation, understand the change in definition, and maintain the system of comprehensive planning in FY '79.

Almost 11% of the funds was used for training programs, many of which were started in FY '78 and continued in FY '79. Eleven percent of the funds was used for programs for Special Projects including programs in rural areas and programs for minority and poverty groups. Almost 10% of the funds was used to assist advocacy programs at the state and local level. Projects were also funded for public awareness, case management, and alternative living arrangements in FY '79.

Less than \$2 million was expended for 37 Special Projects in FY '80. The average size of each grant was reduced from over \$70,000 in FY '79 to just over \$50,000 in FY '80. The same areas of activities were emphasized in FY '80 as in FY '79. Most of the projects in FY '80 were continuations of projects originally funded in FY '78 and FY '79.

Nearly 30% of the FY '80 funds was used for technical assistance and over 22% was used for projects in the nonvocational social development service area. Fourteen percent was used for advocacy programs and assistance to advocacy programs. Over 12% was used for programs for special groups. Eight percent was used for child development projects. Eight percent was used for projects in training programs. Public awareness and alternative living arrangements were also funded with FY '80 funds.

The impact of PL 95-602, Title V can be seen in areas of Special Project grants funded in FY '79 and FY '80. In FY '78, 41% of the Special Project funds was used for projects in the four priority areas of service and advocacy. In FY '79, these areas of funding utilized over 44% of the funds, and in FY '80 over 46% of the funds was expended in these areas.

Figure 2 shows the percent of Special Projects by topical headings for the three fiscal years of '78, '79, and '80. There was a total of \$21 million expended for Special Projects during the three years.

Just over 21% of the Special Project funds was used for technical assistance during the three year period between

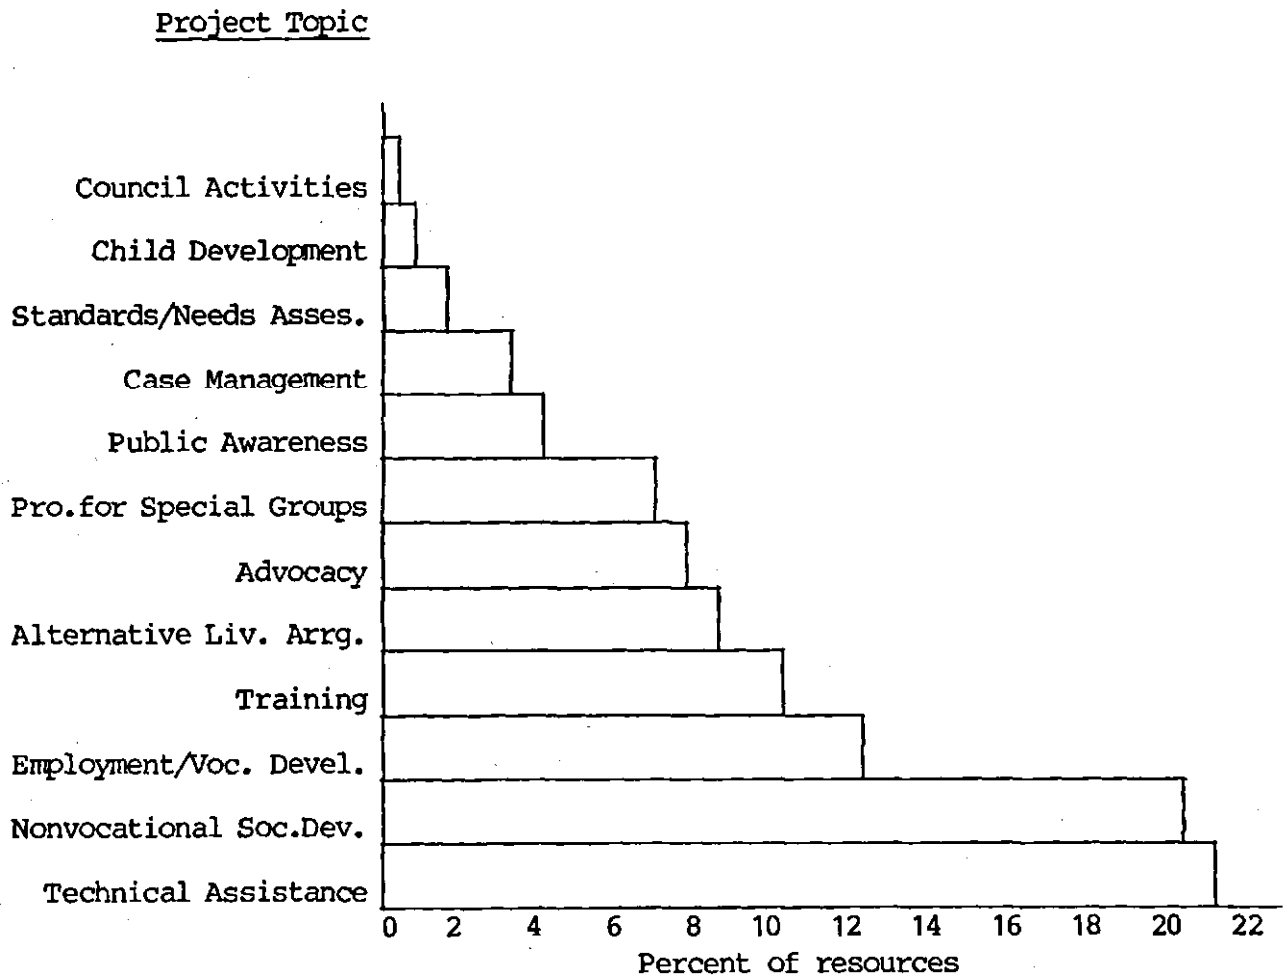

Figure 2. Percent of Resources Used for Special Projects by Project Topics for the Three Fiscal Years '78, '79, and '80

October 1, 1977 and September 30, 1980. Over 20% was used for projects in the area of nonvocational social development at the state and local level. Just over 12% of the Special Project funds was used for employment and vocational development projects. Training projects received over 10% of the funds during the three year period.

Special Projects in the area of alternative living arrangements required 8.8% of the funds over three years and advocacy projects used just under 8% of the funds. Seven percent of the funds was used for programs for special groups.

Public awareness projects accounted for 4.4% of the funds. Case management accounted for 3.6% of the funds and 1.6% was

expended for needs assessment. Child development projects used 1% of the funds.

The total amount for Special Projects and Projects of National Significance during the three year period was \$36,896,000. Figure 3 shows the percent of all Special Projects by topical headings for the period between October 1, 1977 and September 30, 1980.

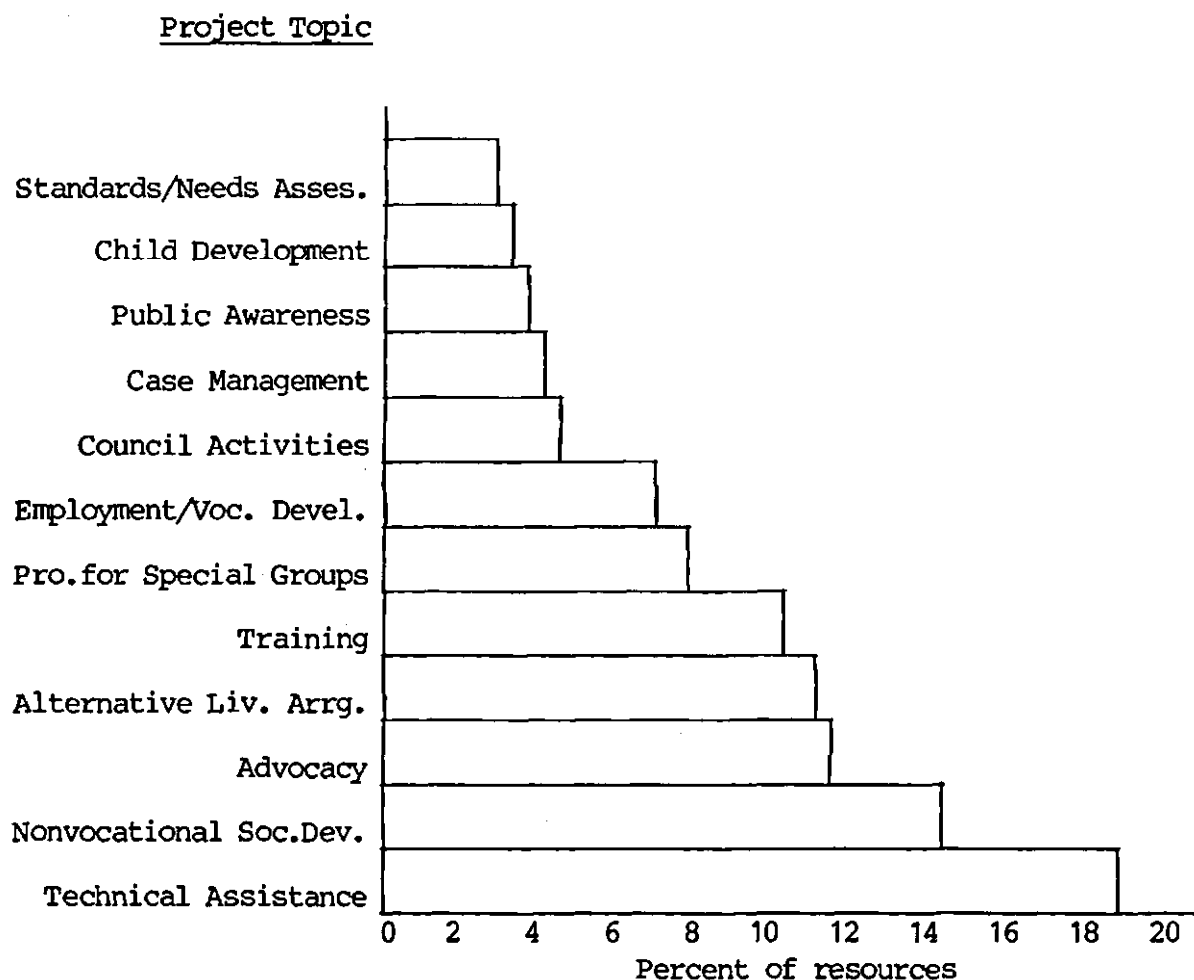

Figure 3. Percent of Resources Used by Special Projects and Projects of National Significance for the Three Fiscal Years '78, '79, and '80

During the three year period, almost 19% of Section 145 monies was used for technical assistance. Technical assistance projects were funded at just over \$6.9 million. These projects aided Councils in implementation of programs, developed and

maintained the comprehensive planning process, and improved the quality of services for individuals who are developmentally disabled.

Just over \$5 million of Section 145 monies was used to fund projects in the area of nonvocational social development service. There were a variety of projects funded at the national, regional, state and local levels which aided individuals who are developmentally disabled and created model programs for imitation by service providers.

Nearly 12% of the Section 145 monies was used to aid in implementation of the advocacy program in the three year period. The \$4.3 million was used for technical assistance to advocacy programs, national and regional conferences, and legal assistance in the three year period.

Over 11% of the Section 145 monies was used to fund alternative community living projects. Nearly \$4.2 million was used for this purpose. These projects help establish model programs and demonstration projects for establishing alternative community living arrangements.

Over 10% of the Section 145 funds was used for training programs. The nearly \$3.8 million was used to train personnel, professionals, para-professionals, and volunteers in information, techniques and skills related to the developmentally disabled.

Programs for special groups such as the aged, minority groups, and programs for rural areas accounted for just over 8% of the expenditures of Section 145 funds, or \$3 million.

Programs for employment and vocational development of individuals were funded with 7% of the Section 145 monies. The \$2.6 million was expended in Special Projects in FY '78 prior to the passage of PL 95-602 and the change of emphasis and program focus.

Projects related to Council activities and a project to establish the UAF telecommunications system required 4.5% of Section 145 monies. This percent of the funds accounted for just over \$1.6 million.

Projects in case management were funded at the \$1.3 million level in the three year period, which represented 3.7% of the Section 145 funds. Projects in child development were funded at the \$1.2 million level, and represented 3.3% of the funds.

Public awareness projects used 3.6% of the funds, or just over \$1.3 million. Projects to establish national standards and needs assessment programs were funded with 3% of the funds, or just over \$1.1 million in the three year period encompassing FY '78, FY '79, and FY '80.

IMPACT OF DEFINITION

The Special Projects funded with Section 145 monies can be divided into five groups in order to assess the impact of the definition of developmental disabilities in PL 95-602 when compared with the definition in PL 94-103. The five groups of projects are:

1. Projects affecting DD community
2. Advocacy projects
3. Projects for employment/vocational development
4. Telecommunications projects
5. Projects in four priority areas/special groups

Each of the 400 Special Projects funded within the three year period of this report was assigned to one of the five categories. Actually, there were 262 individual projects funded during the three years, but 138 of the 262 Special Projects were extended for a second and, in some cases, third year. For the purposes of this report, each project has been assumed to be a one year project, therefore the report contains information on the 400 Special Projects. The target population and number of individuals served has been analyzed in order to be responsive to the report requirements contained in PL 95-602.

The Special Projects assigned to group 1 are all projects involving technical assistance, public awareness, training, standards/needs assessment, and Council activities. Table 5 contains the amount and percent of resources expended in each of these areas of activity.

TABLE 5. AMOUNT AND PERCENT OF FUNDS USED FOR SPECIAL PROJECTS AFFECTING THE ENTIRE DD COMMUNITY FUNDED IN FY '78, FY '79, AND FY '80 BY AREA OF ACTIVITY

Area of activity	FY '78		FY '79		FY '80	
	Amount	%	Amount	%	Amount	%
Technical Assistance	\$3,628,091	50.7	\$2,212,064	52.6	\$1,126,936	55.4
Public Awareness	848,960	11.9	394,205	9.4	81,362	4.0
Training	1,924,155	26.9	1,326,421	31.5	528,314	26.0
Standards	584,023	8.1	275,110	6.5	296,075	14.6
Council Activities	170,284	2.4	0	0	0	0
Total	\$7,155,513	100	\$4,207,800	100	\$2,032,687	100

The magnitude of service according to disability groups is contained in Table 6.

TABLE 6. AMOUNT AND PERCENT OF SPECIAL PROJECT FUNDS WHICH AFFECTED THE ENTIRE DD COMMUNITY BY DISABILITY GROUPS FOR FISCAL YEARS '78, '79, AND '80

Disability group	FY '78		FY '79		FY '80	
	Amount	%	Amount	%	Amount	%
Mental Retardation	\$4,686,861	65.5	\$2,705,615	64.3	\$1,113,912	54.8
Cerebral Palsy	672,618	9.4	513,352	12.2	290,674	14.3
Epilepsy	1,559,901	21.8	828,937	19.7	353,687	17.4
Autism	107,334	1.5	63,117	1.5	32,523	1.6
Other	128,799	1.8	96,779	2.3	241,891	11.9
Total	\$7,155,513	100	\$4,207,800	100	\$2,032,687	100

In FY '78, almost \$4.7 million of Special Project money in the first category affected individuals who were mentally retarded. Nearly \$700,000 affected individuals who were cerebral palsied, \$1.5 million affected individuals with epilepsy, just over \$100,000 affected individuals with autism, and just over \$100,000 affected individuals with other handicapping conditions.

In FY '79, \$2.7 million of Special Project monies affected individuals who were mentally retarded, just over \$500,000 affected individuals with cerebral palsy, and over \$800,000 affected individuals who were epileptic. Just over \$63,000 affected the autistic, and \$96,000 affected individuals with handicapping conditions other than those listed.

In FY '80, just over \$1.1 million of Special Project monies affected individuals who were mentally retarded, and almost \$300,000 affected individuals who were cerebral palsied. In the same year, just over \$350,000 affected individuals who were epileptic and \$32,000 affected individuals who were autistic. Nearly a quarter of a million dollars was spent on individuals with other handicaps in FY '80 in the first category of Special Project funding.

The percent of Special Project monies spent for advocacy and support of advocacy increases each of the three fiscal years encompassed by this report. In FY '78, \$1,720,251 of Special Project monies was so spent, which represented 8.8% of the appropriation. In FY '79, the amount spent for advocacy was \$1,572,072, or 12.5% of the appropriation. In FY '80, 22% of the appropriation was spent for advocacy, which represented \$1,046,570.

Table 7 shows the magnitude of services provided by Special Project monies in the area of advocacy for Fiscal Years '78, '79, and '80.

TABLE 7. AMOUNT AND PERCENT OF SPECIAL PROJECT FUNDS USED FOR ADVOCACY BY DISABILITY GROUPS FOR FY '78, FY '79, AND FY '80

Disability group	FY '78		FY '79		FY '80	
	Amount	%	Amount	%	Amount	%
Mental Retardation	\$1,131,925	65.8	\$ 946,387	60.2	\$ 540,030	51.6
Cerebral Palsy	144,502	8.4	102,185	6.5	85,818	8.2
Epilepsy	163,424	9.5	88,037	5.6	84,773	8.1
Autism	55,048	3.2	50,306	3.2	35,584	3.4
Other	225,352	13.1	385,157	24.5	300,365	28.7
Total	\$1,720,251	100	\$1,572,072	100	\$1,046,570	100

In FY '78, 65.8%, or \$1,131,925, of the Special Project funds expended for advocacy benefited individuals who were mentally retarded. The individuals with cerebral palsy were benefited by \$144,502, or 8.4%, of the funds in advocacy projects. There was 9.5% of the funds, or \$163,424, expended for individuals with epilepsy, and just over \$55,000 for the autistic. Other handicapped were assisted with 13.1% of the funds, or \$225,352 in FY '78.

In FY '79, \$946,387, or 60.2%, of Special Project monies in advocacy were used to benefit the mentally retarded. There was 6.5% of the funds, or \$102,185, used for the cerebral palsied, and 5.6%, or \$88,037, used for individuals with epilepsy. There was 3.2% of the funds, amounting to \$50,306, used for the autistic in FY '79. Nearly one-fourth of the Special Project funds used for advocacy went for individuals with handicaps other than those listed.

In FY '80, just over 50%, or \$540,000, was used to benefit the mentally retarded. Almost the identical amount of 8% went to both the individuals with cerebral palsy and the individuals with epilepsy. The autistic received the benefit of 3.4%, or \$35,584. The other handicapping conditions received the benefit of \$300,365, or 28.7% of the funds.

There were several Special Projects funded in the area of employment and vocational development in FY '78. Most of these projects went toward funded programs in sheltered workshops designed for individuals who were mentally retarded. The amount funded for this purpose in FY '78 was \$2,545,567, or 13% of the funds appropriated for Special Projects in FY '78.

Employment and vocational development were not categories for which Special Project funds were used in FY '79 and FY '80. The reason for the decrease and omission of Special Project funds being used in these areas in FY '79 and FY '80 was that the priority service areas of PL 95-602 omit these categories. The Special Project funds were primarily used in the four priority areas, advocacy, training and technical assistance in the Fiscal Years '79 and '80.

The omission of the category of employment and vocational development in FY '79 and FY '80 as a category of funding is more a change in the emphasis of the 1978 amendments to the DD law rather than the definition of developmental disabilities in PL 95-602.

There was \$1,499,825 of Special Project monies expended for the UAF telecommunications system. The distribution of this money according to disabilities is approximately 55% for the mentally retarded, 9% for the cerebral palsied and epileptic, and 3% for the autistic. About 24% of the money is distributed to handicaps other than the ones listed. Therefore, of the amount expended for the telecommunications system, \$824,904 is designated for individuals who are mentally retarded, \$134,984 each for the cerebral palsied and for individuals with epilepsy, and \$45,000 for the autistic. There is \$359,953 assigned to individuals with handicaps other than the ones listed.

There was a total of \$8,143,669 Special Project funds used for projects in the four priority service areas and projects for special groups in FY '78 which involved a total of 204,897 individuals who were developmentally disabled, as shown in Table 8. Seventy-nine percent of these individuals were mentally retarded, 3.3% were cerebral palsied, 12% were epileptic, and 1.5% were autistic.

TABLE 8. NUMBER AND PERCENT OF INDIVIDUALS SERVED AND AMOUNT AND PERCENT OF SPECIAL PROJECT FUNDS EXPENDED FOR PROJECTS IN THE FOUR PRIORITY SERVICE AREAS OF CASE MANAGEMENT, CHILD DEVELOPMENT, ALTERNATIVE LIVING ARRANGEMENTS, AND NONVOCATIONAL SOCIAL DEVELOPMENT AND PROJECTS FOR SPECIAL GROUPS

Disability group	FY '78				FY '79				FY '80			
	Number	%	Amount	%	Number	%	Amount	%	Number	%	Amount	%
Mental Retardation	161,923	79.0	\$6,165,800	75.7	112,624	73.2	\$3,687,173	70.6	53,503	54.1	\$1,031,198	61.5
Cerebral Palsy	6,636	3.3	578,795	7.1	6,498	4.2	438,700	8.4	13,550	13.7	211,269	12.6
Epilepsy	24,674	12.0	1,072,024	13.2	24,193	15.7	558,820	10.7	14,934	15.1	258,218	15.4
Autism	3,048	1.5	236,408	2.9	2,905	1.9	141,010	2.7	1,716	1.8	53,656	3.2
Other	8,616	4.2	90,642	1.1	7,736	5.0	396,919	7.6	15,197	15.3	122,402	7.3
Total	204,897	100	\$8,143,669	100	153,956	100	\$5,222,622	100	98,900	100	\$1,676,743	100

There was a total of \$5,222,622 Special Project funds used for projects in the four priority service areas and projects for special groups in FY '79 which involved a total of 153,956 individuals who were developmentally disabled. Just over 73% of these individuals were mentally retarded, over 4% were cerebral palsied, 15.7% were epileptic, and 1.9% were autistic. Five percent were handicapped because of conditions other than those listed.

There was a total of \$1,676,743 Special Project funds used for projects in the four priority service areas and projects for special groups in FY '80 which involved 98,900 individuals who were developmentally disabled. Just over 54% were mentally retarded, 13% were cerebral palsied, 15.1% were epileptic, and 1.8% were autistic. There were 15.3% who were handicapped because of conditions other than those listed.

Table 9 contains a comparison of utilization of Special Project funds distributed by disability groups for the three fiscal years of this report with the exception of those funds distributed for employment and vocational development for the reasons heretofore stated.

There was a total of \$17,019,433 Special Project funds spent on projects other than employment in FY '78. Just over 70% of this amount was expended for individuals who were mentally retarded, 8.2% for the cerebral palsied, 16.4% for the epileptic, and 2.4% for the autistic.

In FY '79, there was a total of \$12,502,919 expended for Special Projects with the exception of that which was spent for employment. Of this amount, 65.3% was spent for individuals

who were mentally retarded, 9.5% for the cerebral palsied, 12.9% for the epileptic, and 2.4% for the autistic. Just under 10% was expended for projects for handicapped individuals other than those listed.

TABLE 9. SPECIAL PROJECT FUNDS EXPENDED DISTRIBUTED BY DISABILITY GROUPS FOR FISCAL YEARS '78, '79, AND '80

Disability group	FY '78		FY '79		FY '80	
	Amount	%	Amount	%	Amount	%
Mental Retardation	\$11,984,586	70.4	\$ 8,164,079	65.3	\$2,685,141	56.5
Cerebral Palsy	1,395,915	8.2	1,189,821	9.5	587,761	12.3

Autism	398,790	2.4	299,433	2.4	121,763	2.6
Other	444,793	2.6	1,238,808	9.9	664,657	14.0
Total	\$17,019,433	100	\$12,502,919	100	\$4,756,000	100

In FY '80, \$4,756,000 was expended on all Special Projects. Individuals who were mentally retarded were involved in 56.5% of the projects, cerebral palsied in 12.3% of the projects, epileptic in 14.6% of the projects, and autistic in 2.6% of the projects. 'Other' handicapping conditions received 14% of the expenditures.

Table 10 contains the comparison of the percent of expenditures between FY '78, the control year, and FY '79 and FY '80, the two experimental years, in relation to the expenditures of Special Project monies funded under Section 145 of PL 94-103 in FY '78 and PL 95-602 in FY '79 and FY '80 by disability groups.

TABLE 10. COMPARISON OF THE PERCENTAGE OF EXPENDITURES OF SPECIAL PROJECT MONIES BETWEEN FY '78 AND FY '79 AND FY '80 BY DISABILITY GROUPS

Disability group	FY '78	FY '79	FY '80
	Percent	Percent of change	Percent of change
Mental Retardation	70.4	- 5.1	- 13.9
Cerebral Palsy	8.2	+ 1.3	+ 4.1
Epilepsy	16.4	- 3.5	- 1.8
Autism	2.4	0	+ .2
Other	2.6	+ 7.3	+ 11.4

The apparent effect of applying the definition of developmental disabilities in PL 95-602 on the magnitude of Special Project funding is a 13.9% decrease in the percent used for individuals with mental retardation and a 11.4% increase in the amount of money expended for individuals with handicaps caused by other than mental retardation, cerebral palsy, epilepsy or autism.

Table 11 contains a comparison of the numbers of individuals involved in Special Projects by disability between FY '78 and FY '79 and FY '80.

TABLE 11. COMPARISON OF THE NUMBER OF INDIVIDUALS INVOLVED IN SPECIAL PROJECTS BETWEEN FY '78 AND FY '79 AND FY '80 BY DISABILITY GROUPS

Disability group	FY '78	FY '79	FY '80
	Percent	Percent of change	Percent of change
Mental Retardation	79.0	- 5.8	- 24.9
Cerebral Palsy	3.3	+ .9	+ 10.4
Epilepsy	12.0	+ 3.7	+ 3.1
Autism	1.5	+ .4	+ .3
Other	4.2	+ .8	+ 11.1

The apparent effect of applying the definition of developmental disabilities in PL 95-602 on the number of individuals involved in Special Projects is a decrease in the percent of individuals with mental retardation by almost 25% and an increase in the percent of individuals who are cerebral palsied, epileptic and autistic, and also an increase in the number of individuals with 'other' handicapping conditions by 11.1%.

It is important to make an assessment, evaluation and comparison of services provided to persons with developmental disabilities through the Special Projects.

There are at least two ways in which such an assessment, evaluation and comparison of services provided under Special Projects might be made. One way to evaluate services is to ascertain the amount of Special Project funding which went into developing standards and implementing standards for services for individuals who are developmentally disabled. Another way to assess, evaluate and compare services is to examine the service providers used to conduct the Special Projects in each of the fiscal years of '78, '79, and '80 to determine any change in service providers.

It must be pointed out that Grants of National Significance and Special Projects are awarded through a comparative bid process in which peer review teams are used at the national and regional levels to rate each proposal. With this quality control process of grant awards in effect, it is assumed that the most qualified resource is used for each of the Special Projects funded.

Taking the first indicator of quality, information already presented shows that nearly 3% of the Special Project monies were expended for the development and implementation of standards in FY '78. In FY '79, 2.1% of the Special Project monies were used for this purpose. In FY '80, the amount of Special Project monies used for standards of service was 6.2%.

The one national project dedicated to the development of service standards for services to individuals who are developmentally disabled is the project conducted by the Accreditation Council for Services for Mentally Retarded and Other Developmentally Disabled Persons. There were other projects which trained ICF/MR evaluation teams at the regional and state levels.

A further analysis of the service providers used shows that the same or nearly the same providers were used for Special Projects in each of the three fiscal years.

There were 20 different universities used to provide services in 29 different Projects of National Significance. Table 12 shows the universities that conducted Projects of National Significance in FY '78, FY '79, and FY '80.

There were 14 universities which were conducting national projects in FY '78. There were 15 universities conducting national projects in FY '79, of which six did not have national projects in FY '78. There were 10 universities conducting national projects

**TABLE 12. UNIVERSITIES WHICH CONDUCTED PROJECTS OF NATIONAL SIGNIFICANCE

in FY '80. All projects in FY '80 are continuations, second or third year, of original projects funded in earlier years.

It should be noted that most of the universities listed on Table 12 are University Affiliated Facilities and conduct programs under the recently developed standards for the UAF's. The universities conducted 50% of the Projects of National Significance in the three year period.

Table 13 shows the non-profit organizations used to conduct Projects of National Significance during the three year period of FY '78, FY '79, and FY '80. There were 23 non-profit organizations used to conduct Projects of National Significance over the three year period. There were 13 organizations which conducted projects in FY '78, three projects continued in FY '79, and two of those projects continued in FY '80.

There were seven new projects started in FY '79 which were granted to organizations not used to conduct projects in FY '78. Three of the seven projects continued through FY '80. There were three new projects started in FY '80 granted to organizations which did not have grants in the prior years. However, it should be noted that many of these organizations had Special Projects at the regional and local levels prior to receiving Projects of National Significance grants.

There were two State Governments and one City Government which conducted Grants of National Significance. The two State Governments were used in FY '78. Projects were operated by the New York Department of Mental Hygiene and the Massachusetts Department of Mental Health. In FY '80, a project was awarded to the City of Los Angeles.

National and local associations have traditionally conducted Projects of National Significance. Table 14 shows the associations which conducted Projects of National Significance in FY '78, FY '79, and FY '80.

Table 14 shows the thirteen associations which conducted Projects of National Significance. Eight of the associations conducted projects funded in FY '78, of which two projects continued through FY '79 and one continued through FY '80. Five associations conducted new projects in FY '79, of which three were continued through FY '80. Four of the five associations used in FY '79 for new projects were different from those used in FY '78.

There were no changes in the service providers used to conduct the Special Projects in FY '79 and FY '80 from those used in FY '78 due to the fact that only continuation monies were made available to the Regional Offices in those two years. There were no new Special Projects funded at the regional level in FY '79 and FY '80.

In summary, the quality of Special Projects remained consistent throughout the three year period since similar service providers or the same service providers were used for the conduct of the projects and an effective peer review group process was used in selection of the service providers to receive awards.

SERVICE PROVIDERS

The initial instructions in Section 145 of PL 95-602 allow the Secretary to make "project grants to public or non-profit private entities." A variety of service providers were used for the Grants of National Significance and Special Projects during the three year period. The service providers can be classified in four categories. The four categories of service providers used are:

1. Non-profit organizations
2. Universities
3. State Governments
4. Associations

Non-profit organizations were used for their specialized services and knowledge in providing services to individuals who are developmentally disabled. The majority of non-profit organizations used for Projects of National Significance and Special Projects were service providers who specialized in providing specific services.

Universities were used as service providers for Projects of National Significance and Special Projects. University Affiliated Facilities provided assistance in performing many of the national projects and Special Projects at the regional, state and local levels. Non-UAF universities were also used as resources of Special Projects during the three year period.

Projects of National Significance and Special Projects were also conducted by State Governments. Departments of Human Resources and Departments of Mental Retardation were recipients of several Grants of National Significance.

Associations were used as a resource for conducting Projects of National Significance and Special Projects. National, state and local Associations of Retarded Citizens were recipients of grants for Special Projects. The United Cerebral Palsy Associations at all levels were also used as sources, as were the Epilepsy Associations. Other associations were also used as sources for Projects of National Significance and Special Projects during FY '78, FY '79, and FY '80.

Table 15 shows the service providers used for the Projects of National Significance in FY '78, FY '79, and FY '80.

Universities were used as providers for 44% of the Projects of National Significance in FY '78. Universities received 16 grants which totaled \$2,535,433 in FY '78. Non-profit organizations received 28% of the Projects of National Significance in

TABLE 15. AMOUNT, PERCENT AND NUMBER OF PROJECTS BY SERVICE PROVIDERS USED FOR GRANTS OF NATIONAL SIGNIFICANCE FOR FISCAL YEARS '78, '79, AND '80

Service Provider	Fiscal '78			Fiscal '79			Fiscal '80		
	No. of Proj.	Amount	%	No. of Proj.	Amount	%	No. of Proj.	Amount	%
Non-Profit Organizations	13	\$1,626,296	28.2	10	\$2,095,191	28.8	8	\$1,239,795	44.6
Universities	16	2,535,433	44.0	17	4,363,639	59.9	11	930,426	33.5
State Governments	2	566,864	9.8	0	0	0	1	100,000	3.6
Associations	9	1,037,407	18.0	7	820,962	11.3	4	508,779	18.3
Total	40	\$5,766,000	100	34	\$7,279,792	100	24	\$2,779,000	100

FY '78. There were 13 grants awarded to non-profit organizations, for a total of \$1,626,296. Eighteen projects were awarded to associations, for a total of \$1,037,407. Almost 10% of the Grants of National Significance were awarded to State Governments, for a total of \$566,804 in two grants in FY '78.

Universities were the recipients of 17 Grants of National Significance in FY '79, for a total of \$4,363,639. This represented almost 60% of the total Grants of National Significance in FY '79. More than \$3 million of these grants were awarded to University Affiliated Facilities.

Ten Grants of National Significance were awarded to non-profit organizations for \$2,095,191 in FY '79. This represented nearly 29% of the Grants of National Significance awarded in FY '79. Associations were used as service providers for seven Projects of National Significance in FY '79. Associations received a total of \$820,962, or just over 11% of the grants in FY '79. No grants were awarded to State Governments in FY '79.

Eight projects were awarded to non-profit organizations in FY '80 for a total of \$1,239,795, which was almost 45% of the awards made for Grants of National Significance. Just over 33% of the awards was made to universities in FY '80 under Grants of National Significance. This amounted to \$930,426 of the FY '80 appropriation. Over 18% of the projects was awarded to associations, for a total amount of \$508,779. One grant was awarded to a State Government in the amount of \$100,000 in FY '80.

Figure 4 shows the percent of the grants of National Significance for each of the four categories of service providers used for the three year period from October 1, 1977 through September 30, 1980.

There was a total of \$15,824,792 appropriated for Grants of National Significance in the three year period. Nearly 50%, \$7.8 million, was awarded to universities. Just over 31%, \$4.9 million, was awarded to non-profit organizations. Fifteen percent, \$2.3 million, was awarded to associations for Grants of National Significance. Just over 4%, \$.6 million, was awarded to State Governments in the three year period.

Figure 4. Percent of Funds Used by Projects of National Significance by Service Providers Used for the Fiscal Years '78, '79, and '80

Table 16 shows service providers used for the Special Projects for Fiscal Years '78, '79, and '80. The Special Projects were projects awarded at the regional level for activities conducted at the regional, state or local level.

A total of \$13,801,000 was awarded for Special Projects in FY '78. Nearly 40% of the Special Projects were conducted by non-profit organizations, indicating the service nature of several projects conducted at the local level. There was \$5.4 million awarded to non-profit organizations in FY '78.

Just over 33% of the Special Project grants were awarded to universities in FY '78. The universities received a total of \$4.6 million during this year. Just over \$2 million of Special

TABLE 16. NUMBER OF PROJECTS AND AMOUNT OF FUNDING FOR EACH CATEGORY OF SERVICE PROVIDER OF SPECIAL PROJECTS IN FY '78, FY '79, AND FY '80

Service Provider	Fiscal '78			Fiscal '79			Fiscal '80		
	No.of Proj.	Amount	%	No.of Proj.	Amount	%	No.of Proj.	Amount	%
Non-Profit Organizations	76	\$ 5,421,745	39.3	30	\$2,247,936	42.5	16	\$ 824,074	41.7
Universities	57	4,615,557	33.4	25	1,754,168	33.1	14	804,318	40.7
State Governments	31	2,093,753	15.2	11	702,336	13.3	6	309,986	15.7
Associations	29	1,669,945	12.1	7	588,768	11.1	1	38,622	1.9
Total	193	\$13,801,000	100	73	\$5,293,208	100	37	\$1,977,000	100

Project grants was awarded to State Governments, which represented 15% of the appropriations. Associations were awarded 12% of the Special Projects in FY '78 in the amount of \$1.6 million.

The percent of distribution of Special Project funds of the \$5.2 million in FY '79 mirrored that of the distribution in FY '78 in respect to service providers used. Just over 42% was awarded to non-profit organizations in the amount of \$2.2 million. Just over 33% was awarded to universities. Thirteen percent of the Special Project funds for FY '79 was awarded to State Governments, while 11% was used by associations for the conduct of Special Projects in FY '79.

In FY '80, just under \$2 million was appropriated for Special Projects. Forty-one percent went to non-profit organizations and 40% went to universities. Nearly 16% went to State Governments and almost 2% was awarded to associations.

Figure 5 shows the percent of Special Project grant funds for each of the four categories of service providers used for the three year period from October 1, 1977 through September 30, 1980.

There was a total of \$21,071,208 appropriated for Special Projects for the three year period. Forty percent, or \$8,493,755, was provided for projects operated by non-profit organizations. Thirty-four percent, or \$7,174,043, was awarded to universities to conduct Special Projects. Just under 15%, or \$3,106,075, was provided to State Governments for the conduct of Special Projects and 10.9%, or \$2,297,335, was appropriated to associations for the conduct of Special Projects in the three year period.

Figure 5. Percent of Funds Used by Special Projects by Category of Service Providers Used for the Fiscal Years '78, '79, and '80

Figure 6 shows the percent of Section 145 projects for each of the four categories of service providers used for the fiscal years encompassed by FY '78, FY '79, and FY '80.

There was a total of \$36,896,000 appropriated for all projects funded under Section 145 during the three fiscal years. Forty percent of the appropriation was provided to universities. Thirty-six percent was provided to non-profit organizations. Twelve percent was used for associations to conduct Special Projects. Ten percent was provided to State Governments with the opportunity to conduct Special Projects during the three year period.

Figure 6. Percent of Funds of Section 145 Special Project Funds for Each of the Categories of Service Providers Used for the Three Year Period of Fiscal Years '78, '79, and '80

The cutback in appropriations for Special Projects has significantly reduced the resources available to the Developmental Disabilities Program and individuals with developmental disabilities.

One significant loss as a result of the cutback is the resource of national, state and local associations which usually stay on the cutting edge of the needs of the handicapped and the gaps in the service network. Parents groups and grass root advocacy groups are the first to try innovative programs for the benefit of the disabled.

Also lost to the DD Program with cutback in appropriation of Special Project funds are the specific research and model programs conducted and developed by the universities.

The DD Program is not the same dynamic and innovative program without significant Special Projects and technical assistance. The program has little flexibility without adequate funds for Section 145 projects.

PROGRAMS AND SERVICES IN PRIORITY AREAS

PL 95-602, Title V, focused the Developmental Disabilities Program in four priority areas by identifying them as areas of service which States were to emphasize in the three years between FY '79 through FY '81 and by requiring States to use no less than 65% of Part C monies for services. States were to select at least one and no more than two areas of service to emphasize in FY '79, FY '80, and FY '81. The four areas of priority services from which States were to make their selection were:

1. Case Management Services
2. Child Development Services
3. Alternative Community Living Arrangements
4. Nonvocational Social Developmental Services

The four priority service areas were not new or unique service areas to the Developmental Disabilities Program since these were the four service areas in which over 60% of the Part C monies had been expended in FY '77 and FY '78. The major factor which confronted the Developmental Disabilities State Planning Councils and Administrative Agencies was to support activities in only one or two of the service areas rather than in all four of the areas, which had been the practice in previous years.

There were several Grants of National Significance and Special Projects funded for programs and projects in the four priority service areas identified in PL 95-602, as has been heretofore documented in this report. These programs, funded through Section 145, frequently were used as models for subsequent State and local programs funded with Part C monies and/or State and local monies. The following contains a listing of the agencies and organizations which conducted programs funded with Section 145 monies during the three year period in each of the four priority service areas. The information includes the name and address of the agency or organization and the classification of program and/or service provided.

CASE MANAGEMENT SERVICES

PL 95-602, Title V, Section 102, paragraph 8(C) defines case management services as follows:

The term "case management services" means such services to persons with developmental disabilities as will assist them in gaining access to needed social, medical, educational, and other services; and such term includes—

(i) follow-along services which ensure, through a continuing relationship, lifelong, if necessary, between an agency or provider and a person with a developmental disability and the person's immediate relatives or guardians, that the changing needs of the person and the family are recognized and appropriately met; and

(ii) coordination services which provide to persons with developmental disabilities support, access to (and coordination of) other services, information on programs and services, and monitoring of the person's progress.

The following list of organizations and agencies are those which have provided programs or projects funded with Special Project funds during the three year period between October 1, 1977 and September 30, 1980 in the area of case management.

The programs and projects in case management are divided into two classifications. The two classifications are:

- Coordination of Services
- Case Management System

Organizations and agencies which implemented programs in which a specific method or process was used to coordinate a variety of services needed by individuals who are developmentally disabled are listed as having conducted a coordination of services program. Many of these programs uniformly developed a coordination process for support services within the community.

Organizations and agencies which actually implemented a case management system for individuals are identified as having developed a "case management system. Some of the identified organizations and agencies also developed standards for the Individual Habilitation Plans on which the case management system is based.

Region IX
Arizona
Nevada

Region X
Oregon

The following is a list of organizations and agencies at the State and local level which conducted programs in the area of case management during the period between October 1, 1977 and September 30, 1980. These programs were partially or fully funded with Part C monies.

The list of organizations and agencies is State specific displayed under the Health and Human Services Region of jurisdiction. This listing is presented as a resource for any State Planning Council, Administrative Agency, organization or State Agency considering developing a case management program for the benefit of individuals who are developmentally disabled.

CHILD DEVELOPMENT SERVICES

PL 95-602, Title V, Section 102, paragraph 8(D) defines child development services as follows:

The term "child development services" means such services as will assist in the prevention, identification, and alleviation of developmental disabilities in children, and includes (i) early intervention services, (ii) counseling and training parents, (iii) early identification of developmental disabilities, and (iv) diagnosis and evaluation of such developmental disabilities.

The following list of organizations and agencies are those which have provided programs or projects funded with Special Project funds during the three year period between October 1, 1977 and September 30, 1980 in the area of child development services.

The programs and projects in child development services are divided into four classifications. The four classifications are:

- Early Intervention
- Parent Training
- Identification
- Evaluation

Organizations and agencies which designed and/or implemented programs of direct service for infants are listed as providing early intervention services.

Organizations and agencies which designed and/or conducted training programs for parents, support programs to be used in the home, or counseling programs for parents of disabled infants are listed as providing parent training services.

Organizations and agencies which have designed materials or conducted a specific program for disabled children under five years of age are listed as providing identification services. Also, prevention programs are listed under the classification of child development programs.

Organizations and agencies which conducted screening and/or evaluation of high risk infants are listed as providing evaluation services.

<u>Organization/Agency</u>	<u>Address</u>	<u>Program/Service</u>

Region X

Alaska
Idaho
Washington

The following is a list of organizations and agencies at the State and local level which conducted programs in the area of child development services during the period between October 1, 1977 and September 30, 1980. These programs were partially or fully funded with Part C monies.

The classification of programs has been expanded beyond the four classifications used in the display of Special Projects to encompass those programs designed for prevention and those designed to provide genetic counseling.

The list of organizations and agencies is State specific displayed under the Health and Human Services Region of jurisdiction. This listing is presented as a resource for any State Planning Council, Administrative Agency, organization or State Agency considering developing a child development program for the benefit of infants who are developmentally disabled or "at risk" and/or their parents.

ALTERNATIVE COMMUNITY LIVING ARRANGEMENTS

PL 95-602, Title V, Section 102, paragraph 8(E) defines alternative community living arrangement services as follows:

The term "alternative, community living arrangement services" means such services as will assist persons with developmental disabilities in maintaining suitable residential arrangements in the community, and includes inhouse services (such as personal aides and attendants and other domestic assistance and supportive services), family support services, foster care services, group living services, respite care, and staff training, placement, and maintenance services.

The following list of organizations and agencies are those which have provided programs or projects funded with Special Project funds during the three year period between October 1, 1977 and September 30, 1980 in the area of alternative community living arrangements.

The programs and projects in alternative community living arrangement services are divided into eight classifications. The eight classifications are:

- House Services
- Family Support Services
- Foster Care Services
- Group Living Services
- Respite Care
- Staff Training
- Placement Services
- Maintenance Services

Organizations and agencies which implemented programs in which model programs used home aides, assistance or other in-house supportive services and supplies are listed under house service programs.

Organizations and agencies which implemented programs in family support services for maintaining individuals in community settings are listed under family support services.

Organizations and agencies which developed and/or placed individuals in foster care situations are listed under foster care programs.

Organizations and agencies which developed, operated and/or contributed to the operation of group homes, apartment living arrangement programs or other community living arrangement facilities are listed under group living services.

Organizations and agencies which developed, operated and/or contributed to the establishment of respite programs are listed under respite care.

Organizations and agencies which developed and/or conducted programs in which personnel was initially trained and/or in which in-service training was provided to existing personnel who worked in community living facilities for individuals who are developmentally disabled are listed under staff training.

Organizations and agencies which developed and/or provided programs which led to community placement, other than in the case of foster care, of individuals who are developmentally disabled are listed under placement services.

Organizations and agencies which developed and/or provided programs which aided in the retention of individuals who are developmentally disabled to live in community facilities and which cannot be classified under one of the seven already described identification classifications are listed under maintenance services.

NONVOCATIONAL SOCIAL DEVELOPMENTAL SERVICES

PL 95-602, Title V, Section 102, paragraph 8(F) defines nonvocational social developmental services as follows:

The term "nonvocational social developmental services" means such services as will assist persons with developmental disabilities in performing daily living and work activities.

The following list of organizations and agencies are those which have provided programs or projects funded with Special Project funds during the three year period between October 1, 1977 and September 30, 1980 in the area of non-vocational social developmental services.

The definition of this priority service area, in PL 95-602, does not contain sub-classifications of programs to be conducted under this priority area as do the other three priority areas heretofore described. Therefore, there is no sub-classification provided. The topic of each program which appears under the program/service in each listing is the topic or service provided in the program.

The following is a list of organizations and agencies at the State and local level which conducted programs in the area of nonvocational social developmental services during the period between October 1, 1977 and September 30, 1980. These programs were partially or fully funded with Part C monies.

The list of organizations and agencies is State specific displayed under the Health and Human Services Region of jurisdiction. This listing is presented as a resource for any State Planning Council, Administrative Agency, organization or State Agency considering developing a nonvocational social developmental program for the benefit of individuals who are developmentally disabled.

PROGRAMS AND SERVICES IN RELATED AREAS

There are two areas of service which are important to individuals with developmental disabilities but are not priority areas as stated in PL 95-602. PL 94-103, the forerunner to PL 95-602, allowed States to fill gaps in service in any area of service wherein they were found without the need of prior selection of one or two priority areas of service. Many States funded projects in the area of vocational training, employment, and programs in sheltered workshops.

Advocacy became an independent component of the Developmental Disabilities Program with the passage of PL 94-103 which included Section 113. Section 113 required that a State establish a system of protection and advocacy in order to continue to participate in the Developmental Disabilities Program. The Protection and Advocacy Agency which provides the required advocacy program is required to be independent of all service providing agencies and organizations and provide a variety of advocacy services including legal advocacy.

The two areas of programs and services which are important to individuals with developmental disabilities which are featured in this section of the report are Vocational Training Programs and Services and Advocacy Programs.

VOCATIONAL TRAINING PROGRAMS AND SERVICES

One of the most important areas of services for individuals who are developmentally disabled is the area of vocational training and employment. The individual who is disabled has a difficult job attempting to get employment in the competitive labor market. There is a shortage of sheltered employment opportunities for the individual who is disabled.

Many of the adults who are developmentally disabled have been denied the opportunity for an education because the mandate for education for the handicapped is a recent mandate. The lack of education further restricts the individual who is disabled from gaining employment and becoming economically self-sufficient.

There are many gaps in providing services in the area of vocational training and employment for individuals who are developmentally disabled. One of the gaps is that this area of service was omitted from the listing of priority areas in PL 95-602.

One reason for the omission of vocational training and employment from PL 95-602 as a priority service area which has been given is that this area of service for the disabled is the domain of Vocational Rehabilitation. However, this argument is only partly true since Vocational Rehabilitation requires that an individual who receives their services has the potential of employability. Therefore, many individuals who are developmentally disabled are rejected from service because of their lack of potential.

Vocational training and employment for the developmentally disabled have only recently become areas of serious research in the United States. In programs conducted in the last few years, it has been demonstrated that individuals who are developmentally disabled have a far greater potential for employment than heretofore realized. Society has largely been unresponsive to the employability of the handicapped individual through the years.

Section 145 monies and Part C monies from the Developmental Disabilities Act have been used to fund demonstration projects and fill gaps in the service system in vocational training and employment throughout the years. Especially was there an abundance of projects funded in this area in Fiscal Year '78 before the passage of PL 95-602 with its restrictive four priority areas.

The following list of organizations and agencies are those which have provided programs or projects funded with Special Project funds during the three year period between October 1, 1977 and September 30, 1980 in the area of vocational training.

The programs and projects in the vocational training area are divided into eight classifications. The eight classifications are:

- Vocational Rehabilitation
- Pre-Employment Training
- Skill Training
- Vocational Evaluation
- Work Activity
- Sheltered Workshop
- Vocational Training
- Placement

Organizations and agencies which implemented programs in which vocational rehabilitation agencies increased skills, abilities and program activity for the benefit of individuals who are developmentally disabled are listed as conducting programs in vocational rehabilitation.

Organizations and agencies which implemented programs in which individuals were provided training in skills necessary to understand and prepare for employment are listed as conducting pre-employment training programs.

Organizations and agencies which implemented programs in which individuals were provided training in a specific skill are listed as conducting skill training programs.

Organizations and agencies which implemented programs in which individuals were assessed as to their employment potential and employment interests are listed as conducting vocational evaluation programs.

Organizations and agencies which provided individuals opportunities to do work either in restricted or non-restricted environments are listed as conducting work activity programs.

Organizations and agencies which established and/or expanded sheltered workshop programs with funding from Special Project monies are listed as conducting sheltered workshop programs.

Organizations and agencies which provided individuals with a combination of pre-employment training and skill training are listed as conducting vocational training programs.

Organizations and agencies which provided individuals with placement services in the competitive labor market are listed as having conducted programs in placement.

Advocacy is not new to the Developmental Disabilities Program since the parents of individuals who are developmentally disabled have long been advocates for their children. It was primarily through parents and professionals being advocates that the first Federal Public Law for the rights and services of the mentally retarded was passed in 1963. Continued advocacy efforts on the part of parents, professionals, and the disabled themselves brought about the expanded definition of developmental disabilities including all of the nation's most severely handicapped individuals.

The advocate "speaks for" an individual who is unable to speak for himself or herself. The advocate teaches individuals to advocate for themselves or become self-advocates. The advocate represents and/or goes with the individuals to negotiations for services, administrative or legal hearings. These activities **are** illustrations of the activities of an advocacy program which represents individuals who are developmentally disabled.

There is a program of advocacy that is called systems advocacy in which the advocate group attempts to influence legislation, administrative procedures, and the service system for the benefit of a particular group or population. Systems advocacy has been the work of the Developmental Disabilities State Planning Council and the associations and organizations which represent individuals with a particular handicap or disability.

The word advocacy is used twice in PL 95-602 and the responsibility for advocacy is assigned to two groups. Advocacy is the assigned responsibility of the State Planning Council in Section 137 of PL 95-602. The mandated advocate function is:

Each State which receives assistance under this part shall establish a State Planning Council which will serve as an advocate for persons with developmental disabilities (as defined in Section 102(7)).

Advocacy is also the responsibility of the Protection and Advocacy Agency established within the State in compliance with Section 113 of PL 95-602. The mandated advocate responsibility for the Protection and Advocacy Agency is:

In order for a State to receive an allotment under Part C, (1) the State must have in effect a system to protect and advocate the rights of persons with developmental disabilities, (2) such system must, (A) have the authority to pursue legal, administrative, and other appropriate remedies to ensure the protection of the rights of such persons who are receiving treatment, services, or habilitation within the State.

There has never been a clear definition or delineation of responsibilities in the area of advocacy between the State Planning Council and the Protection and Advocacy Agency. Generally, the Protection and Advocacy Agency represents individuals in pursuing legal, administrative and other appropriate remedies in receiving services in the service system. The State Planning Councils primarily seek legislative reform, administrative remedies, and fill gaps in the service system in order to ensure the availability of a comprehensive service system for the benefit of individuals who are developmentally disabled.

In application, the role of advocacy of both the Protection and Advocacy Agency and the State Planning Council has not been clearly articulated where the division of responsibility stops for Protection and Advocacy Agencies and starts for the State Planning Council. It would be of assistance to the Developmental Disabilities Program if there could be a clear definition of advocate responsibility to be carried by the Protection and Advocacy Agency and that to be carried by the State Planning Council.

The overlap of mandated advocacy responsibilities has led to some confusion as to the relationship between the State Planning Council and the Protection and Advocacy Agency in the various States. Some States view the relationship as cooperative in that Part C money is made available for specific programs conducted by the Protection and Advocacy Agency. Some States view the relationship as only to share information and data between the two groups. In a few States there is no communication between the State Planning Council and the Protection and Advocacy Agency.

There have been many advocacy programs funded with Section 145 monies and Part C monies over the years. These programs have provided models for the emergence of the programs offered by the Protection and Advocacy Agencies in the last three years. The Special Projects and the State Planning Councils' advocacy programs were responsible for the timely implementation of the requirements of Section 113 in PL 94-103 on October 1, 1977.

The following list of organizations and agencies are those which have provided advocacy programs or projects funded with Special Project funds during the three year period between October 1, 1977 and September 30, 1980.

The programs and projects in advocacy are divided into three classifications. The three classifications are:

- Legal Advocacy
- Citizen Advocacy
- Institutional Advocacy

Organizations and agencies which implemented advocacy programs for the interpretation of legal rights and legal representation of individuals who are developmentally disabled are listed as having conducted legal advocacy programs.

Organizations and agencies which implemented advocacy programs in which volunteers are recruited and trained to be advocates for individuals who are developmentally disabled are listed as having conducted citizen advocacy programs.

The organization which conducted an advocacy program for individuals in an institution is listed as having conducted an institutional advocacy program.

<u>Organization/Agency</u>	<u>Address</u>	<u>Program/Service</u>
Arizona Association for Retarded Citizens	Phoenix, AZ	Legal Advocacy
Central Minnesota Legal Services	Minneapolis, MN	Legal Advocacy
*Legal Aid of Western Missouri	Jefferson City, MO	Legal Advocacy

*Denotes a Grant of National Significance.

The following is a list of organizations and agencies at the State and local level which conducted advocacy programs during the period between October 1, 1977 and September 30, 1980. These programs were partially or fully funded with Part C monies.

The list of organizations and agencies is State specific displayed under the Health and Human Services Region of jurisdiction. This listing is presented as a resource for any Protection and Advocacy Agency, State Planning Council, Administrative Agency, organization or State Agency which wants to create or expand advocacy programs for the benefit of individuals who are developmentally disabled.
