MAY 3 - 1935

Dear Doctor _____:

I wonder whether you still have contact with _____ of Waltham, Mass. According to our notes, you have seen her, and treated her for Cretinism since 1928, when she was 8 months of age.

Interested in putting together the data on Cretins we have seen, I have abstracted her brief record at the Children's Hospital. Could you kindly send me an abstract of your findings, with dates of treatment, of photos, brands and consistency of thyroid medication, and bases for diagnosis? Your records may contain so much information that this would prove to be a pretty large order. If this is so, I wonder whether I might come out some day, and, with your permission, go through her record myself.

We shall appreciate your assistance in this matter.

Very sincerely yours,
