

RETYPE AND REDACTED FROM ORIGINAL

May 4, 1935

Dear Dr. _____

I beg to acknowledge your letter in regard to _____.

We have been in touch with her since she was eight months old and have photographs from that time on. She is now a patient at this School. I think your suggestion to come out and look over our records is a good one for her records are very voluminous and I am afraid we might not send you just the facts you require.

This patient is one who does not stand thyroid well and we have been able to give her only very minute doses. At the present time while taking only one-tenth of a grain twice a day she has lost weight and becomes very active.

Very truly yours,

Superintendent
