programs for the handicapped

June 1, 1971

MENTAL RETARDATION FUNDS
Department of Health, Education, and Welfare
Fiscal Years 1970-1972

The material on the following pages presents the amount of funds available from the Department of Health, Education, and Welfare for mental retardation programs. Six agencies and offices within the Department administer mental retardation funds that support programs covering a wide spectrum: services, training, construction, research and income maintenance. The first four of these activities represent an estimated obligation of about \$359 million in FY 1972. The income maintenance program will obligate \$296 million during this same year.

The programs operated with these funds are described in the report of the Secretary's Committee on Mental Retardation entitled "Mental Retardation Activities, January 1971." Available from Superintendent of Documents, Washington, D.C. 20402, \$1.00 per copy.

Additional information concerning these tables may be secured from the Secretary's Committee or the agency administering the program.

MENTAL RETARDATION FUNDS FOR GRANTS & SERVICES

Department of Health, Education, and Welfare Fiscal Year 1972

Millions

Agencies Administering Mental Retardation Programs

Activities Supported

Glossary of Terms *

- FISCAL YEAR Year running from July 1 to June 30 and designated by the Calendar year in which it ends.
- AUTHORIZATION -- Basic substantive legislation which sets up a Federal program or agency. Such legislation sometimes sets limits on the amount that can subsequently be appropriated, but does not usually provide budget authority.
- BUDGET AUTHORITY -- Authority provided by the Congress -- mainly in the form of appropriations -- which allows Federal agencies to incur obligations to spend or lend money. While most authority is voted each year, some becomes available automatically under permanent laws -- for example, interest on the public debt.
- OBLIGATIONS -- Commitments made by Federal agencies to pay out money for products, services, loans, or other purposes -- as distinct from the actual payments. Obligations incurred may not be larger than the budget authority.
- FEDERAL FUNDS -- Funds collected and used by the Federal Government, as owner. The major federally owned fund is the general fund, which is derived from general taxes and borrowing and is used for the general purposes of the Government. Federal funds also include certain earmarked receipts, such as those generated by and used for the operations of Government-owned enterprises.
- TRUST FUNDS -- Funds collected and used by the Federal Government, as trustee, for specified purposes, such as social security and highway construction. Receipts held in trust are not available for the general purposes of the Government. Surplus trust fund receipts are invested in Government securities and earn interest.
- * "The U. S. Budget in Brief, FY 1972," Executive Office of the President, Office of Management and Budget, January 1971

Explanatory Notes on Mental Retardation Obligation Tables

Definitions:

Services: Includes services rendered in behalf of the mentally

retarded as well as direct services offered to the mentally retarded. For example, case finding, information and referral programs are included, along with direct medical care and special education programs.

Training: Includes training of professional as well as supportive

personnel. For example, university graduate level training and in-service training in mental retardation institutions are both included. Also, no distinction is made between training for service and training for research.

Estimates: Inadequate reporting data on some programs necessitate the

use of very rough estimates on amount of funds. This is especially true of Medicaid (Title XIX, SSA); the amount shown is based on data from only a limited number of states.

Omission: No data suitable for determining obligations is available

in the public assistance social service program. Even though many States are known to use these funds to support services for the mentally retarded, no reporting procedure exists to determine extent and cost of such activities.

Authorisations

and

Appropriations: Comparision of authorizations and appropriations is not

meaningful in all programs included in these tables.

Table 7 compares authorizations and appropriations levels

only for those programs in which: 1) all funds are

obligated for mental retardation; 2) all funds are obligated

for the handicapped with a significant portion used to

support mental retardation programs.

Developmental

Disabilities: Funds authorized under P.L. 91-517 became available for

the first time in FY 1971; this statute authorizes funds for mental retardation as well as other types of disabilities; e.g., cerebral palsy and epilepsy. However, for fiscal accounting purposes, all funds obligated under P.L. 91-517 are considered in the area of mental retardation.

Income Maintenance:

Obligations for income maintenance support under social security and public assistance are separately identified in the tables. These amounts are based on estimated numbers of mentally retarded persons receiving benefits. Such obligations should be considered in a separate category from those funds appropriated for the support of programs designed specifically for mental retardation programs or known to be related to mental retardation to a significant degree.
