## **EXECUTIVE SUMMARY**

---

During the past twenty years, the Department of Human Services has worked to replace institutional care with services that better allow persons with developmental disabilities to be active members of their communities. To help to accomplish this, a home and community-based services program for persons with developmental disabilities, also referred to as the Mental Retardation and Related Conditions (MR/RC) Waiver, was implemented in 1984. The MR/RC Waiver provides the supports necessary for persons to remain in their communities rather than residing in institutions.

Each year, approximately 600 allocations are awarded increasing the number of persons receiving MR/RC waived services to over 7000. Along with these recipients, the number of persons waiting for these services has also grown. In response to the growth in the waiting list, the 1999 Legislature appropriated funds to serve an additional 100 persons each year. Specific information on the persons who are waiting for services, the allocation structure, and methods to optimize the number of persons served, is the subject of this report.

### **Management of the MR/RC Waiver**

The Department has continued to take administrative actions to help recipients to better access waiver services and to assist counties in managing their waiver resources. Results of these actions include:

- ▶ Decreasing the average difference between the amount of funds that are allowed for waived services and the amount paid, to less than 5 percent (as of October 1, 1999).
- ▶ Encouraging recipients to access other necessary supportive services while waiting for funding through the MR/RC Waiver. These services include: Family and Consumer Support Grants, home care services including personal care, and day training and habilitation services.
- ▶ Redesigning the Developmental Disability Screening Document and information system to collect data on how urgent a person's need is for waived services.
- ▶ Awarding service optimization allocations which allow counties who efficiently manage their waiver resources, to serve additional persons within their existing annual waiver budget.
- ▶ Providing technical assistance to groups of counties to form partnerships to jointly manage their waiver budgets.
- ▶ Developing and improving a computer-based tracking system for counties to use to manage their waiver resources.

## **Intended Outcomes for the Department in Managing the MR/RC Waiver**

To continue to make progress towards serving as many persons on the waiting list as possible, the Department has set the following goals and outcomes for Fiscal Year 2000:

- ▶ **Development of County Partnerships**

The Department will continue to provide technical assistance to counties to form partnerships. By July 2000, at least six partnerships will be operational.

- ▶ **Service Optimization**

Counties and partnerships will continue to strive for efficient management of their waiver resources. By July 2000, an additional 60 persons will be served through service optimization.

- ▶ **Decreasing the Difference Between Amounts Allowed and Paid**

Through the efficient management of waiver resources and the development of additional partnerships, the percentage difference between allowable and paid funding will decrease.

- ▶ **Reducing the Waiting List**

In addition to awarding the anticipated resources, the Department will monitor the number of allocations that are unused and reallocate those allocations to persons on the waiting list. Within the available appropriation, the maximum number of persons possible will receive waiver services.

- ▶ **Improving the Management of the MR/RC Waiver with Information Systems**

The Department has developed and updated a computer-based tracking program for counties to use to manage their waiver resources. By July 2000, all counties will be using the updated version.

## **LEGISLATION**

---

### **Laws of Minnesota 1999**

#### **Chapter 245, Article 4, Section 61, Subdivision 7**

[ANNUAL REPORT BY COMMISSIONER.] Beginning October 1, 1999, and each October 1 thereafter, the commissioner shall issue an annual report on county and state use of available resources for the home and community-based waiver for persons with mental retardation or related conditions. For each county or county partnership, the report shall include:

- (1) the amount of funds allocated but not used;
- (2) the county specific allowed reserve amount approved and used;
- (3) the number, ages and living situations of individuals screened and waiting for services;
- (4) the urgency of need for services to begin within one, two, or more than two years for each individual;
- (5) the services needed;
- (6) the number of additional persons served by approval of increased capacity within existing allocations;
- (7) results of action by the commissioner to streamline administrative requirements and improve county resource management; and
- (8) additional action that would decrease the number of those eligible and waiting for waived services. The commissioner shall specify intended outcomes for the program and the degree to which these specified outcomes are attained.

## INTRODUCTION

---

Before 1981, when a person with mental retardation or a related condition and their family needed services or supports, the options were limited. Medicaid funding was only available to pay for services in Intermediate Care Facilities for the Mentally Retarded (ICFs/MR), which includes state Regional Treatment Centers (RTC) and group homes. In order to help a person remain in their family home or other individualized community settings, changes needed to be made in the way states could use money from Medicaid to pay for services.

In 1981, the federal government passed the Omnibus Budget Reconciliation Act which created the Title XIX Home and Community-Based Services Program. This act allows the Department of Health and Human Services to waive traditional Medicaid requirements and is referred to as the "waiver," and the services it pays for as "waivered services." The Act allows states the option of applying for a waiver to use Medicaid funds to provide home and community-based services as an alternative to institutional care including ICFs/MR or group homes, regional treatment centers, hospitals and nursing facilities. In 1984, Minnesota began its home and community-based services program for persons with mental retardation and related conditions, also referred to as the Mental Retardation and Related Conditions (MR/RC) Waiver.

The goals of the waiver are to provide the necessary services and support which are meaningful to the person receiving the services, respectful of the person's beliefs and customs, and are also cost-effective. Waivered services are different from institutional care services in that they are uniquely developed based on individual needs, and are available or can be developed in their community. Waivered services help a person to become involved in and develop relationships in the community where he or she lives and works, and to develop skills to be as independent as possible. Waivered services may also be modified at any time when the needs of the person change.

To meet these needs, the MR/RC Waiver provides a variety of services to persons who meet the following eligibility requirements:

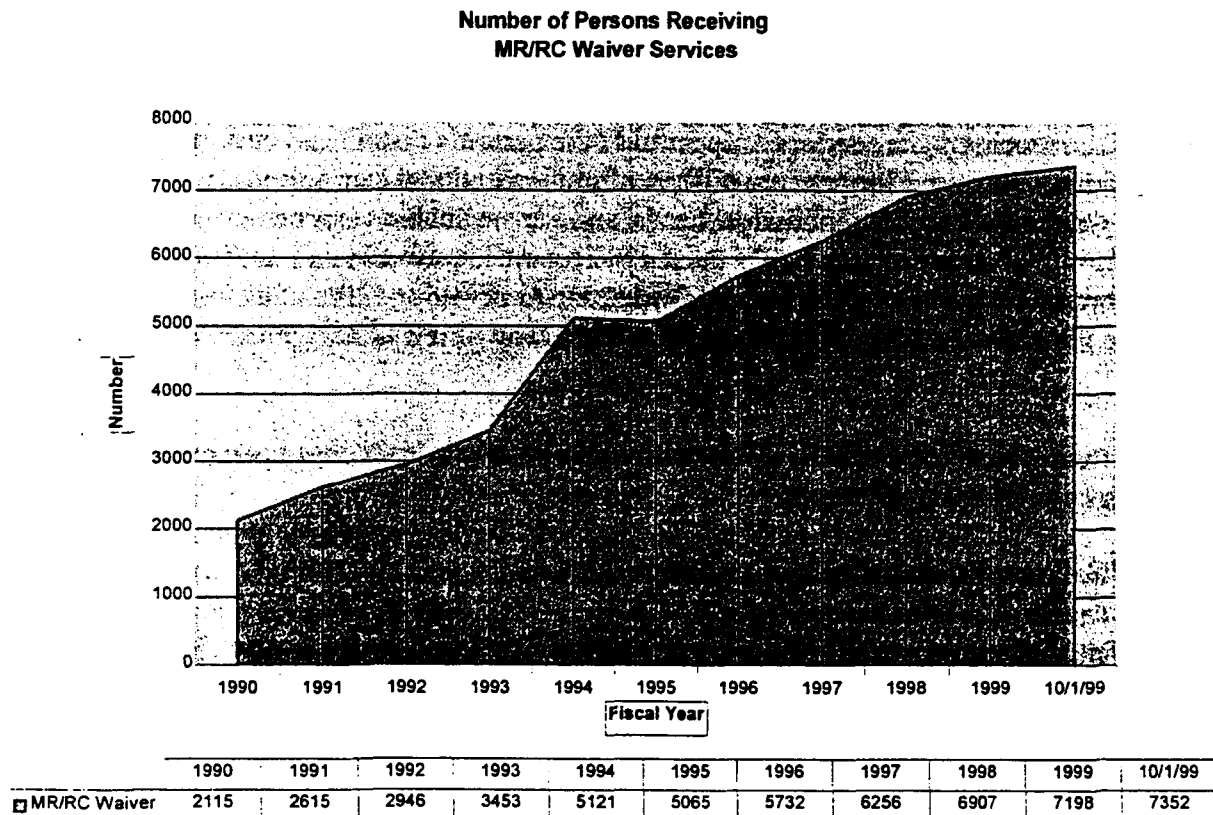

1. Have mental retardation or a related condition
2. Require a 24-hour plan of care
3. Be a resident of an ICF/MR or need the level of services found in an ICF/MR if waiver services were not available
4. Meet income and asset requirements for Medical Assistance (MA), including the deeming waiver for families with disabled children
5. Have made an informed choice requesting waiver services instead of ICF/MR services.

The services available through the MR/RC Waiver include:

Adult Day Care	Extended Personal Care Attendants
Assistive Technology	Homemaker Services
Caregiver Living Expenses	Housing Access Coordination
Caregiver Training and Education	In-Home Family Support
Case Management	Personal Support
Chore Services	Respite Care
Consumer Training and Education	Specialist Services
Consumer-Directed Support	Supported Employment Services
Crisis Respite	Supported Living Services
Day Training and Habilitation	24-Hour Emergency Assistance
Environmental Modifications	Transportation

A description of these services can be found in Attachment A.

The number of persons receiving waived services continues to grow. In 1984, there were less than 300 recipients. That number has grown to 2,115 persons in 1990, 6,989 in January 1999, and as of October 1, 1999, 7,352 person are receiving waived services.

Along with the growth of people on the MR/RC Waiver, the number of persons in institutions, community ICFs/MR and especially, RTCs, continues to fall. In 1990, there were 1320 persons with developmental disabilities in RTCs; today there are 27. (The chart below shows a total of 63 persons in RTCs. This includes 36 persons who are in the Minnesota Extended Treatment Options [METO] program, a highly specialized, short-term program at the Cambridge Regional Human Services Center.)

CSMD 10/1/99

Because of the effort Minnesota has made to ensure that individuals have the choice to live in their communities, each year the Department awards approximately 600 allocations to persons waiting for services. But even with these allocations, the number of people who are still waiting for waived services continues to grow. In response to this growth in the waiting list, the 1999 Legislature increased the appropriation for the MR/RC Waiver to serve an additional 100 persons each year. This fiscal year, a base of 300 allocations is available for persons now in the community who need waived services to remain there. Specific information on the persons who are waiting for services, the allocation structure, and methods to optimize the number of persons served, is the subject of this report.

## **MANAGEMENT AND AUTHORIZATION THE MR/RC WAIVER**

---

The management of the MR/RC Waiver occurs through county agencies. When an individual requests to receive services funded by the waiver, county staff meet with the person and their parent or legal representative. Together, the team develops a person- or family-centered plan that identifies the supports necessary to help the person attain their highest potential of independence and self-sufficiency in their home and community. When the person is found to need waived services and is authorized to begin receiving those services, funding resources are added to the county's annual waiver budget.

Within the county's annual waiver budget, the county has the flexibility to authorize the resources that are necessary to support the recipients and their families. This provides for optimal management of the waiver resources. In addition, the county can redirect their resources based on the changing support needs of the individuals and their families.

Each fiscal year, the Department of Human Services (DHS) allocates new resources, from legislative appropriations, to counties in order to serve individuals waiting for services. County agencies, based on their written procedures and criteria and state policy goals, determine who will receive waived services. The state policy goals which guide these decisions include:

- ▶ Supporting children and families so that children with disabilities have a stable, nurturing environment within their community;
- ▶ Increasing non-institutional alternatives;
- ▶ Supporting the needs of persons in living arrangements that are unstable due to the age or incapacity of the primary caregiver; and
- ▶ Building the capacity of local communities to support persons with disabilities and their families.

When a decision has been reached about the supports an individual needs, the case manager works with the person, their family or legal representative, to develop a comprehensive service plan. Service providers are then determined and contracts are established as needed. County agencies "authorize" the waived services through the Medicaid Management Information System (MMIS) through which service providers file claims and are paid.

The following table illustrates how the MR/RC Waiver program has grown in recipients and funding each fiscal year. The "allowable funding" is the total amount available statewide based on the actual number of recipients receiving approved MR/RC Waiver services. "Paid funding" is the total dollar amount of waived services paid for through the MMIS. When waiver recipients also receive home care services, the paid funding includes the costs of both waiver and home care services.

### Comparison of Allowable and Paid Funding

	Number of People Served	Allowable Funding	Paid Funding	Annual Paid Funding per Person	Difference Between Allowable and Paid	% Difference Between Allowable and Paid
<b>FY 1995</b>	5,042	\$188,154,537	\$171,696,157	\$34,053.00	\$16,458,380	8.75%
<b>FY 1996</b>	5,697	\$233,419,906	\$216,528,808	\$38,008.00	\$16,891,098	7.24%
<b>FY 1997</b>	6,159	\$273,884,207	\$253,734,633	\$41,197.00	\$20,149,574	7.36%
<b>FY 1998</b>	6,843	\$328,211,472	\$311,391,031	\$45,505.00	\$16,820,441	5.12%
<b>FY 1999<sup>1</sup></b>	7,321	\$373,344,144	\$355,014,643 <i>as of 10/1/99</i>	\$48,493.00	\$18,329,501	4.91%

Data Sources: MMIS Service Agreements; MMIS Paid Claims, 10/1/99

The difference between allowable and paid funding can be attributed to a number of areas including:

- ▶ County reserve accounts which are set aside for recipients to meet their changing needs, ensure their health and safety, and provide short-term emergency intervention;
- ▶ High-cost recipients entering the waiver program late in the fiscal year with cost implications for following fiscal years; and
- ▶ County agencies planning to serve new recipients in succeeding fiscal years.

But as the chart demonstrates, the percentage difference between the allowable and paid funding has decreased in the last fiscal years.

Detailed information about specific county or partnership allowable and paid funding patterns can be found in Attachment B. For the last fiscal year, 1998, where the paid claims are complete:

- ▶ 64 counties or partnerships (76%) had spending at less than 95 percent of the allowable resources. These counties represent only 40 percent of the total allowable resources.

---

<sup>1</sup> Not all claims for services provided in FY 1999 have been paid. Providers have one year from the date of service to file a claim.

- ▶ The remaining 20 counties or partnerships (24%) had spending at 95 percent or more of the allowable resources. These counties represent 60 percent of the total allowable resources.

This shows a general pattern in which larger county agencies appear to operate closer to their allowable resource amount than smaller county agencies. Some factors that may influence this pattern include:

- ▶ Larger county agencies operate with a certainty of receiving additional allocations each fiscal year; therefore, they are in a better position to authorize increased service costs for current recipients by planning that new allocations will restore their resource pool;
- ▶ Administrative and technical support may be more readily available in larger county agencies and provide an infrastructure for efficient management of resources; and
- ▶ Larger county agencies have access to a wider provider pool which may allow them to authorize and deliver services as needed; smaller county agencies may have difficulty recruiting appropriate providers, even when fiscal resources are available.

## RESERVE ACCOUNTS

---

Law of Minnesota 1996, Chapter 451, Article 1, Section 2, provided legislation that allowed the Department to authorize local county agencies to keep a reserve capacity within their MR/RC Waiver funds. The intent of the legislation was to support agencies in developing the resources needed to provide continuity of care for current and future waiver recipients. This reserve funding was to be used to meet the changing needs of current recipients, ensure their health and safety, and provide short-term emergency intervention and could not exceed five percent of the total allowable funding resources of a county. Within the two years that this legislation was in effect, DHS authorized twelve county reserve accounts. The percentage of unused or reserve funds for all counties can be found in Attachment B.

The above legislation expired June 30, 1999, but was replaced by Laws of Minnesota 1999, Chapter 245, Article 4, Section 61. The new legislation also allows the Commissioner to authorize local county agencies to establish reserve accounts within their MR/RC Waiver funding resources. This legislation differs from the previous legislation in that the amount of the reserve resource funding must be determined by each agency or partnership, *based on documented past experiences and projected needs*. Reserve accounts will continue to require DHS approval. To date, the Department has not provided information to counties on how to request reserve amounts and no county agency has submitted a revised capacity plan for the Commissioner's approval. Therefore, county specific information on reserve amounts approved and used is not available at this time.

## PERSONS WAITING FOR SERVICES

In January 1999, a report was submitted to the Legislature which gave statistics on the waiting list as of September 1998. At that time, there were 3,295 persons waiting for services. There are now 4,321 persons waiting. This is an increase of 1,026 persons in one year, which is larger than normal growth. The unusual increase may be due to the publicity surrounding the waiting list or the encouragement from advocacy agencies for consumers to request waiver services.

The following chart represents the number of persons with mental retardation or related conditions who are currently on the waiting list. These individuals were screened and chose the MR/RC Waiver, or the waiver is anticipated as an alternative to ICF/MR services. The chart is broken down by both age groups and current living arrangements. Please refer to Attachment C for detailed information for each county agency.

**Number of Persons Waiting for MR/RC Waivered Services Based on Current Living Arrangements and Age Groups**

Current Living Arrangement	Ages 0-12	Ages 13-17	Ages 18-22	Ages 23-39	Ages 40-59	Ages 60-+	Total
Board & Lodge	0	1	1	4	4	2	12
Family Home	1,213	474	470	470	126	13	2,766
Foster Care, Family	55	39	35	117	53	19	318
Foster Care, Live-In	2	1	3	17	8	1	32
Foster Care, Shift Staff	0	7	28	41	42	10	128
ICF/MR	5	10	37	329	285	61	727
Other	27	25	26	51	20	10	159
Own Home	0	0	5	41	21	5	72
RTC/METO	0	0	7	15	6	1	29
Potential from RTC/METO <sup>2</sup>			11	34	24	9	78
<b>TOTALS</b>	<b>1,302</b>	<b>557</b>	<b>623</b>	<b>1,119</b>	<b>589</b>	<b>131</b>	<b>4,321</b>

Data Source: MMIS DD Screening Documents: 10/1/99

<sup>2</sup>Analysis assumes that RTC and METO recipients will request MR/RC Waiver.

The majority of people waiting for the MR/RC Waiver, 66 percent, are living in their own or family home, and of this group, 59 percent are children under the age of 18. This category is also where the majority of the growth in the number of persons waiting for services (763 persons) took place in the last year.

Because of the length of time that people may wait for the MR/RC Waiver, individuals and their families often request waived services in anticipation of future needs. A number of other service options though, may be available to persons currently on the waiting list and may actually meet their needs at this time. For example, all persons with mental retardation or related conditions receive case management. In addition, many persons receive services through the Family or Consumer Support Grant, day training and habilitation programs, home care (including personal care assistants), and other Medical Assistance services. A summary of other possible services can be found in Attachment D (Matrix of Services for Community Supports for Minnesotans with Disabilities Division). County agencies may also use their own funds to provide supportive services to individuals and families in need.

There are also 520 people with developmental disabilities living in nursing facilities<sup>3</sup>. The majority (59%) are age 65 or older. It is possible that some individuals currently living in nursing facilities could live successfully in the community. Based on the past use of waived services for persons in nursing facilities, it is estimated that 15 to 20 people per year would access waived services if available. County agencies continue to be responsive to the planning needs of these individuals as well as those shown in the proceeding table.

---

<sup>3</sup>Data source: MMIS Recipient, DD Screening, and Paid Claims, 10/1/99

## URGENCY OF NEED FOR SERVICES

On April 1, 1999, the Department initiated a change in collecting data to better determine how soon an individual requesting waived services, would actually need or want those services. This data is collected during the completion of the Developmental Disability (DD) Screening Document. The DD Screening Document serves as documentation of eligibility and establishes the authorization of Medical Assistance payments for ICFs/MR, waiver, and nursing facilities. The document also serves as a summary of the Individual Service Plan (ISP).

Since the change in data collection, the Department has been receiving information on the urgency of an individual's need for waived services. This data is compiled after the case manager and individual or their legal representative, have discussed their needs and support systems. It does not reflect the perceived wait for waived services or the anticipation of future waiver allocations. The following table includes statewide information which has been collected since April 1, 1999. Information about the urgency of need by age group can be found in Attachment E; county specific information can be found in Attachment F.

**Urgency of Need for Waivered Services**

Individuals Choosing Waiver with Screening after April 1, 1999		Requesting Waiver Within 12 Months		Requesting Waiver Within 13 to 36 Months		Requesting Waiver Beyond 36 Months		New Screening Not Yet Completed
Living Arrangement	Number	Number	Percent	Number	Percent	Number	Percent	Number
Board & Lodge	3	2	67%	1	33%		0%	9
Family Home	915	537	59%	220	24%	158	17%	1812
Foster Care, Family	80	42	52%	25	31%	13	16%	236
Foster Care, Live-In	9	3	33%	4	44%	2	22%	21
Foster Care, Shift Staff	22	16	73%	5	23%	1	5%	93
ICF/MR	247	119	48%	66	27%	62	25%	470

<b>TOTALS</b>	<b>1340</b>	<b>765</b>	<b>57%</b>	<b>339</b>	<b>25%</b>	<b>236</b>	<b>18%</b>	<b>2835</b>

Data Source: MMIS DD Screening Documents, 10/29/99

## WHAT SERVICES PEOPLE ARE WAITING FOR

The MR/RC Waiver offers up to twenty-one services to people on the waiver. Over the years, the types of services have been expanded to provide maximum flexibility to meet the unique needs of the recipients. While the MR/RC Waiver provides maximum service design flexibility, the people waiting for services typically select case management and habilitation services, which include in-home family support, supported living services, respite care, and vocational services. In general, these services may be viewed as more traditional and more familiar to persons when requesting services than some of the newer services. The following table outlines the services requested on a statewide basis for those waiting for funding through the MR/RC Waiver.

**Services Requested by Persons Waiting for MR/RC Waiver Funding**

Service Requested	Number of People Waiting	Percent of People Waiting
Adult Day Care	13	0.3%
Assistive Technology	935	22.0%
Caregiver Training & Education	748	17.6%
Consumer-Directed Services	64	1.5%
Consumer Training & Education	37	0.9%
Crisis-Respite	514	12.1%
Environmental Modifications	1,572	37.0%
Homemaker	283	6.7%
Housing Access	33	0.8%
In-Home Family Support	2,149	50.6%
Live-In Personal Caregiver	7	0.2%
Personal Support	580	13.7%
Respite Care	1,989	46.9%
Specialist Services	829	19.5%
Supported Living Services (SLS)	1,840	43.4%
24-Hour Emergency	78	1.8%
Vocational Services	1,729	40.7%

Data Source: MMIS DD Screening Documents, 10/1/99

## **SERVICE OPTIMIZATION WITHIN EXISTING ALLOCATIONS**

In July 1998, the Department received federal approval to serve additional waiver recipients without using additional funding. When county agencies do not fully use their allowable waiver resources, they are then able to optimize services using the available funds to serve people who have been waiting for waived services.

Service optimization is available to county agencies or partnerships who meet the following criteria:

- ▶ Have paid claims for waived services which less than their annual waiver budget;
- ▶ Have implementation plans for meeting requests for institutional discharges, including anyone living in regional treatment centers, the Minnesota Extended Treatment Options (METO) program, or community-based ICFs/MR that are closing or downsizing;
- ▶ Agree to continue to plan for the on-going and future needs of current waiver recipients;
- ▶ Offer waiver services in a consumer-directed service delivery manner; and
- ▶ Have implemented a quality assurance plan that exceeds the current scope of health and safety assurances.

Priority for service optimization is given to county partnerships (or larger county agencies who would not benefit from partnership formation) and agencies with eligible recipients who are living in unstable situations due to the age or incapacity of their primary caregiver. As of October 1999, the Department has awarded 58 service optimization allocations to 27 counties. Through these allocations, an additional 30 persons are currently receiving waived services.

## **DEPARTMENT ACTIONS TO IMPROVE WAIVER MANAGEMENT**

The Department has continued to identify and take administrative actions to assist counties and recipients to better access waived services and manage their allowable resources. The following is a partial list of Department actions:

- ▶ County waiver coordinators were alerted that augmentative and alternative communication systems are available directly through MA state plan services. The Department was concerned that a significant number of people waiting for waived services were indicating a need for assistive technology and that this need may be immediately met through MA state plan services rather than the MR/RC Waiver. The Department provided additional copies of this written information to the waiver coordinators and case managers.
- ▶ The Department is providing monthly reports to counties regarding allowable, authorized, and paid claims information. Counties have also received DHS developed software and training so this information is readily available at the county level.
- ▶ The DD Screening Document has been redesigned to assess the urgency or time frame in which waived services are needed. This was implemented in April 1999.
- ▶ In-conjunction with Arc Minnesota, a survey of all persons identified as waiting for the MR/RC Waiver was conducted. This information was used by Arc to provide individual advocacy services and by the Department to clarify policies, rules, and regulations.
- ▶ The Department is continuing to work closely with county agencies who have expressed an interest in creating county partnerships to better serve MR/RC Waiver recipients. CroToWaCaMo has formed due in part to this effort. This partnership includes Crow Wing, Todd, Wadena, Cass, and Morrison counties. As waiver budgets of these five agencies were combined, it was determined that 22 people on the waiting list could be served through service optimization. At the same time CroToWaCaMo is able to meet both the current and future needs of current waiver recipients with less risk of service denials or service delays.
- ▶ In September 1999, Northwest 6, a partnership of six counties in northwestern Minnesota, was formed. The counties in this partnership include: Mahnomen, Marshall, Norman, Pennington, Polk, and Roseau. Fifteen service optimization allocations were awarded to Northwest 6 this year. In the next fiscal year, an additional 15 allocations will also be awarded.
- ▶ Current discussions for additional partnerships are taking place throughout Minnesota.

## **RECOMMENDED ADDITIONAL ACTIONS**

---

Legislation in 1999 created several avenues by which the waiting list for MR/RC Waiver may be decreased including:

- ▶ Increased allocations will be distributed each fiscal year.
- ▶ Creating additional waiver allocations within the confines of the forecast budget if ICF/MR closure activity is lower than projected.
- ▶ Developing criteria by which county agencies may receive Medical Assistance administrative reimbursement for identified activities. This reimbursement could assist counties in becoming more efficient and effective in their waiver management, and thus, serve more individuals waiting for services.

The Department is also committed to working with agencies in providing more flexible and person-centered services. In part, this activity can occur through providing consumer-directed community support services as an optional waived service. To date, four agencies (Blue Earth, Dakota, Hennepin, and Olmsted Counties) have memorandums of understanding with the Department to provide this service. The Department is also working with these agencies in learning how services can be better shaped to meet personal needs and preferences, support natural relationships, create longstanding community infrastructures, and avoid use of institutional care, all within a cost-effective and cost-efficient framework.

## **INTENDED OUTCOMES OF THE PROGRAM**

To serve as many persons on the waiting list as possible through the MR/RC Waiver, the Department has set the following goals for Fiscal Year 2000:

### **Goal 1: Development of County Partnerships**

Currently, a number of counties in Minnesota are able to efficiently manage their annual waiver budgets to provide the flexibility required to meet the needs of their waiver recipients. However, other counties are considering entering into partnership agreements to achieve this same flexibility. Partnerships allow several counties to pool their waiver budgets and then to jointly manage these resources. The Regional Resources Specialists (RRS) from the Department, are actively involved with several county groups to provide support and technical assistance to help the partnerships become operational.

#### **Intended Outcome**

By July 2000, at least six county partnerships will be operational to efficiently manage their MR/RC Waiver resources.

### **Goal 2: Service Optimization**

Service optimization is also an option for counties who efficiently manage their waiver resources. Through this option, counties are able to serve additional persons with no additional dollars. This makes it possible for counties to more effectively use their unspent MR/RC Waiver dollars. Since implementation of service optimization in July 1998, 58 service optimization allocations have been given to 27 counties and 30 additional persons are receiving waived services. In addition to individual counties receiving optimization allocations, forming county partnerships will also allow service optimization allocations to be awarded.

#### **Intended Outcome**

By July 2000, an additional 60 persons will be served through service optimization.

### **Goal 3: Decreasing the Difference Between Amounts Allowed and Paid**

Through more efficient waiver management, the percentage difference between the allowable and paid funding has begun to decrease. As of October 1999, the difference for FY 1999 is less than 5 percent, down from 7.69 percent in 1995. With the development of partnerships where counties will be able share their resources, this trend is expected to continue.

#### **Intended Outcome**

Each fiscal year, the percentage difference between the allowable funding and paid funding will decrease.

#### **Goal 4: Reducing the Waiting List**

With the additional resources available through the 1999 legislation, the number of persons served will increase at a faster rate than previous projections. The actual reduction in the waiting list though, may be difficult to measure as the number of persons may actually grow as new eligible individuals are added to the list. Therefore, the effect on the waiting list is best measured by use of available allocations.

To ensure that the as many people as possible have access to waiver services, the Department will be monitoring allocations throughout the year. All unused allocations, generally unused conversion allocations (conversion allocations are those that are available to persons in ICFs/MR that are closing), will be reallocated to persons on the waiting list.

##### **Intended Outcome**

The maximum number of persons will receive waived services within the available appropriation.

#### **Goal 5: Improving Management of the MR/RC Waiver with Information Systems**

The Department has developed a computer-based tracking program for counties to use to effectively manage their MR/RC Waiver resources. The tracking program provides counties and partnerships with immediate information in order to:

- ▶ Determine capacity when adding those persons from the waiting list to the MR/RC waiver
- ▶ Plan for the changing needs of current recipients (as in adding needed services or changing the level or cost of services).
- ▶ Determine the capacity with regard to the management of risk through the on-going monitoring of allowable and authorized dollars
- ▶ Plan for the addition of efficiency (unfunded) allocations through tracking of unspent but available dollars

“Version 1.7” of the tracking program has been installed in all counties. The program continues to be updated and the latest version, 2.0, which provides improved reliability, is in the process of being distributed.

##### **Intended Outcome**

By July 2000, all counties will be using Version 2.0 of the tracking program.

**MR/RC Waiver  
Service Descriptions**

## **MR/RC WAIVER SERVICE DESCRIPTIONS**

**Adult Day Care:** Adult day care programs provide integrated supervision, care, assistance, training, and activities that are age appropriate to help a person to be as involved in the community as possible and have meaningful social experiences with non-disabled peers. Meals and transportation are covered by this service. Specialized therapies and adaptive equipment may also be provided. It is intended to help the person maintain skills, and to prevent or delay the use of institutional services. A person can choose adult day care services instead of DT&H services when it has been decided that DT&H services are no longer appropriate to meet the person's needs.

**Assistive Technology:** Assistive technology refers to devices, equipment, or a combination of these which improve a person's ability to perform activities of daily living, control or access the environment, or communicate. This service may include evaluation for an assistive device, equipment rental during a trial period, obtaining and customizing devices, as well as training and technical assistance to the person, caregivers, and staff to teach the person how to best use the device or equipment. This service will also cover the cost of maintenance and repair of devices, and rental of equipment while a device is being repaired.

**Caregiver Living Expenses:** This service provides payment for the rent and food that may be reasonably attributed to a live-in personal caregiver. The live-in personal caregiver also provides one of the following waived services: residential habilitative services; personal support services; extended personal care attendant services; or consumer-directed community supports.

**Caregiver Training and Education:** This service provides training for a person who is a primary caregiver, such as a parent, on a variety of topics such as developmental disabilities, community integration, parent skills, family dynamics, stress management, intervention, and mental health. The training is provided by individuals, agencies, and educational facilities. The service allows for the cost of enrollment fees, materials, mileage, hotel and meal expenses to be paid so that a parent or primary caregiver can attend the training sessions.

**Case Management:** This service is available to all persons with mental retardation or a related condition. The purpose of this service is to help locate, coordinate and monitor social and daily living activities, medical, and other services needed to meet the specific needs of a person and his or her family.

**Chore:** This services supports or assists a person or his/her primary caregiver to keep their home clean and safe. Examples include, washing floors, windows and walls; basic home maintenance; or moving heavy items of furniture to provide safe entry and exit. Chore services are provided when the person who is regularly responsible for these activities is temporarily absent or is unable to manage the home and care for themselves or others in the home.

**Consumer Training and Education:** This service provides training and education to a person to strengthen their self-advocacy skills, to learn how to better exercise their civil rights, and/or to acquire skills that strengthen their ability to exercise control and responsibility over the services and supports they receive. The training is provided by individuals, agencies, and educational facilities. The service allows for the cost of enrollment fees, materials, mileage, hotel and meal expenses to be paid.

**Consumer-Directed Community Supports:** Consumer-directed community supports are services which provide support, care and assistance to a person, prevent the person's institutionalization and allow the person to live an inclusive community life. Consumer-directed community supports are designed to build, strengthen or maintain informal networks of community support for the person. Consumer-directed community support services are available when local agencies have memorandums of understanding with DHS to demonstrate the feasibility and effectiveness of consumer-directed community supports.

**Crisis Respite:** Crisis-respite services are specialized services which provide short-term care and intervention to a person. Crisis-respite services give needed relief and support to the caregiver and protect the person or others living with them. Crisis-respite services include activities: assessment; development of a provider intervention plan; consultation and training to the providers and/or caregivers; development and implementation of a transition plan if out of home crisis-respite was provided; on-going technical assistance to the caregiver or provider; and recommendations for revisions to the Individual Service Plan (ISP).

**Day Training and Habilitation:** Day training and habilitation (DT&H) provides training, supervision, and assistance to help a person develop and maintain vocational and daily life skills and become more involved in the community. These services are coordinated with residential services.

**Environmental Modifications:** Environmental modifications are equipment and physical adaptations to a person's home and/or vehicle necessary to help the person have greater independence. This service includes only modifications to the home or vehicle which are of direct and specific benefit to the person due to his or her disability.

**Extended Personal Care Attendant:** This service provides a continuation of personal care assistant services when the need for service exceeds the scope and duration of the service available through the state plan service option.

**Homemaker Services:** General household activities are provided through this service by a trained homemaker when the person who is regularly responsible for these activities is temporarily absent or is unable to manage the home and care for themselves or others in the home.

**Housing Access Coordination:** The purpose of the service is to help a person make choices about where to live, the type of home the person wishes to have, and who will be a roommate(s), if any. This service helps the person to identify affordable, accessible housing and assures that housing needs are provided for separately from other service needs. It may also include assistance in identifying options and making choices, planning for on-going maintenance and/or repair of the home, and identification of financial resources such as eligibility for housing subsidies and other benefits.

**In-Home Family Support:** This service provides training and support to a person and his or her family, including extended family, in the family home and in the community. It is designed to increase the family's ability to care for and support the person in the family home.

**Personal Support:** This service helps a person increase independence, productivity, and involvement in the community. Personal support services provide more flexible and less formal, or less intensive support than supportive living services. It includes supervision and assistance to help a person find and use community services and to participate in community activities. This service may be provided in a person's home or in the community.

**Respite Care:** This service provides short-term care to a person when the family member(s) or primary caregiver cannot be there or needs a rest from his or her responsibilities. Respite care may be provided in the person's home or in a different home or residential setting which has been approved by the county. Respite care may include day and overnight services.

**Specialist Services:** Specialist services include services which are not available through regular Medical Assistance (MA). These are specific services to meet the unique needs of the person which provide assessment, program development, training and supervision of staff and caregivers, monitoring of how programs are provided, and evaluation of service outcomes to assure that staff and caregivers are able to meet the needs of the person.

**Supported Employment Services:** This service is available to a person who lived in an ICF/MR any time before receiving waived services. Supported employment services provide on-going training and support to the person while he or she is a paid employee at an existing business or industry in the community. This provides the opportunity to work with people who do not have disabilities and who are not paid caregivers or service providers.

**Supportive Living Services (SLS):** The purpose of this service is to teach specific skills to a person who requires daily intervention. Daily intervention means providing on-going supervision, training or assistance to help the person reach his or her individual goals in the following areas: self-care, sensory/motor development, interpersonal skills, communication, reduction and/or elimination of challenging behaviors, community living, mobility, health care, leisure and recreation, money management and household chores.

**24-Hour Emergency Assistance:** This service provides on-call counseling and problem solving and/or immediate response for assistance at the person's home due to a health or personal emergency. Electronic personal emergency response systems may be provided. 24-hour emergency assistance is available to people who live in their own home or with their primary caregiver and do not receive 24-hour supervision.

**Transportation:** This service provides transportation that allows an individual with a disability to gain access to community services, resources, and activities. This service is offered in accordance with the needs and preferences identified in the person's plan of care.

## **Waiting List Summary by Living Arrangement and Age for MR/RC Waiver**

This report lists persons on the waiting list by where they are living and their county of financial responsibility. The report also shows the number of persons in a county that are eligible for the waiver ("Potential") in addition to the number of persons who have actually chosen the waiver and are waiting for services.

**WAITING LIST SUMMARY BY LIVING ARRANGEMENT AND AGE FOR MIRC WAIVER

## **Matrix of Services for the Community Support for Minnesotans with Disabilities Division**

This report describes other services that are available for persons with disabilities

## Matrix of Services for Community Support for Minnesotans with Disabilities Division

Types of Services	Benefit Level	Eligibility Criteria	Funding Source	Avg./Annual Cost/Person
<b>Family Support</b> State cash assistance program for maintaining the child with MR/RC in their family home. Funds are for those expenses which are incurred as a result of the disability, not for costs which would normally occur even if the child did not have the disability. Approved categories include: medications, education, day care, respite, special clothing, special diet, special equipment, transportation, other.	\$3,000 per year limit	1) Under the age of 22; 2) Live with biological or adoptive parent; 3) Have mental retardation or a related condition; 4) Be at risk of institutionalization as determined by a screening team; and 5) Family income less than \$72,446	100% state funding. Some counties provide similar support programs with 100% county funding.	State program: \$2,119/yr  Approx. 755 persons  State Budget: \$1.6 million
<b>Semi-Independent Living Services</b> Services provided to adults with MR/RC in their home and community to maintain or increase their ability to live in the community. Services include instruction or assistance in the following areas: meal planning and preparation, shopping, money management, apartment/home maintenance, first aid, response to emergencies, self-administration of medications, use of generic resources, telephone use, accessing public transportation, and socialization skills.	Costs cannot exceed the average state share of ICF/MR costs (\$23,580 in SFY 1999)	1) 18 years old or older; 2) Have mental retardation or a related condition; 3) With this level of support, not at risk of institutionalization; and 4) Require systematic instruction or assistance in order to manage activities of daily living.	70% State 30% County Counties use county funds to fulfill the matching requirements. Some counties provide county dollars above county matching requirements and some also fund 100% of costs for some persons not served through state supported allocations.	\$4,893.39 (includes both state and county dollars).  Approx. 1,484 persons  Total state budget: \$5.5 Million Total county budget: \$1.6 Million

**MA HOME CARE (all costs are as of 12/25/1998)**

Types of Services	Benefit Level	Eligibility Criteria	Funding Source	Avg./Annual Cost/Person
<b>Personal Care Assistant Services (PCA)</b> Use of Medicaid funds for noninstitutional medically oriented services that are required because of an individual's physical or mental impairment. The program serves consumers of all ages and disabilities/diagnoses primarily to accommodate the need for relatively unskilled maintenance or supportive nursing care furnished in the home. Assessments are done by county Public Health Nurses. PCA services are supervised by an RN. Services include assistance with activities for daily living such as dressing, grooming, bathing, eating, toileting, and respiratory care, seizure and behavior.	Generally, maximum services limit is 14.5 hours per day of PCA service (some exceptions allow service to be provided above this amount).	1) Medically necessary 2) Authorized by a licensed physician 3) Documented in a written service plan 4) Provided at recipient's place of residence or other location (not hospital, NF, ICF, or health care facility) 5) Recipient must be in stable medical condition 6) Recipient must be able to "direct own care" or reside with responsible party	Regular MA 54% Federal 46% State	\$14,398  Unduplicated # of recips: 6,595  Total MA Expenditure: \$94,957,739
<b>Private Duty Nursing</b> Private Duty Nursing Services for continuous care nursing needs.	Generally, maximum services limit is 9.5 hours and up to 16 hours per day of hospital level of Private Duty Nursing (some exceptions allow service to be provided above this amount)	Same as above.	Regular MA 54% Federal 46% State	\$34,234 Unduplicated # of recips: 529 Total MA Expenditure: \$18,110,286
<b>Home Health Aide Services</b> Intermittent home health aide visits provided by a certified home health aide.	Maximum is one visit per day.	1) Medically necessary 2) Ordered by a licensed physician 3) Documented in a written service plan 4) Provided at recipient's place of residence (not hospital or LTC facility)	Regular MA 54% Federal 46% State	\$2,477 Unduplicated # of recips: 4,490 Total MA Expenditure: \$11,125,489
<b>Therapies</b> Physical Therapy                      Respiratory Therapy Occupational Therapy              Speech Therapy All services provided by a licensed therapist at the recipient's place of residence.	Maximum is one visit per discipline per day.	Same as above	Regular MA 54% Federal 46% State	\$1,631 Unduplicated # of recips: 1,302 Total MA Expenditure: \$2,124,504
<b>Skilled Nurse Visits</b> Intermittent skilled nurse visits provided by a licensed nurse.	Maximum is one visit per day.	Same as above, except that skilled nurse visits are provided up to 90 days in an ICF/MR to prevent admission to a hospital or nursing facility.	Regular MA 54% Federal 46% State	\$580 Unduplicated # of recips: 15,143 Total MA Expenditure: \$8,789,619
<b>Total for all MA Home Care</b>			Regular MA 54% Federal 46% State	\$6,132 Unduplicated # of recips: 22,033 Total MA Expenditure: \$135,107,639

## **Urgency of Need for MR/RC Waiver Services**

This report shows the number of persons waiting for waived services in each county of responsibility and how urgent their need is. Collecting data about urgency of need began on April 1, 1999. Persons who are included in the "Unspecified" column are those who have not received a screening since that date.
